FOREWORD

The Uniform Crime Reporting Program for more than 60 years has supplied our Nation with an overview of crime experience. Though recent enhancements to the Program will provide the law enforcement community more comprehensive data, more resources and innovative approaches are needed to address criminality.

We at the FBI, after assessing our internal structure in order to provide the best service possible to the criminal justice community, have incorporated our criminal justice services and associated information systems into a single organizational division. The consolidation of systems within one entity will ensure that efforts are properly coordinated and that the Bureau is responsive to the needs of our partners in law enforcement and our entire user community including the American public, the media, legislators, and others who have an interest in criminal justice issues.

With this concept in mind, the Criminal Justice Information Services (CJIS) Division was created. Effective June 1992, CJIS was composed of the Integrated Automated Fingerprint Identification System (IAFIS), National Crime Information Center (NCIC), and the Uniform Crime Reporting (UCR) Program. Each of these systems is undergoing revision to meet ever-increasing informational needs, and their consolidation will allow the elevation of complex systems development to a higher priority. Even though there will be interaction among the updated systems, each is being developed independently. The FBI must ensure they completely integrate in order to provide the criminal justice community the information services it needs into the 21st century. In furtherance of this objective, all identification services provided by the former Identification Division joined CJIS in mid-1993. With CJIS, the FBI will provide state-of-the-art identification and information services to the local, state, Federal, and international criminal justice community, as well as to other users. As a customer-driven organization, CJIS will continually seek ways to be quality focused and to meet the ever-changing needs of law enforcement.

In conjunction with the consolidation of all criminal justice information systems, the FBI is relocating these functions to a new facility designed specifically to accommodate the various programs. The facility is under construction in Clarksburg, West Virginia, with a scheduled completion date of 1995.

We at the FBI anticipate that with the revitalizing and centralizing of services will come the ability to have a closer working relationship with the criminal justice community that will result in more effective law enforcement services. Just as we at the Federal level must face increasing budget constraints, so must law enforcement agencies at other levels of government. Through close cooperation, we can best use our available resources to provide the services our society needs to continue the fight against crime.

Soon the predictability and understanding of crime will be greatly enhanced through the increased implementation of the National Incident-Based Reporting System. The modernization currently underway with services in the operations of NCIC to NCIC 2000 will enhance law enforcement's ability to respond to lawlessness. Also through IAFIS, the FBI will be able to provide, through computerization, timely identification services in a virtually paperless environment.

With these new and innovative resources, we in law enforcement will be better able to meet the ever-increasing demands of our profession. It is our vision for CJIS to provide the best information services to the criminal justice community and our citizenry nationwide.

CRIME FACTORS

Each year when *Crime in the United States* is published, many entities–news media, tourism agencies, and others with an interest in crime in our Nation–compile rankings of cities and counties based on their Crime Index figures. These simplistic and/or incomplete analyses often create misleading perceptions which adversely affect cities and counties, along with their residents. Assessing criminality and law enforcement's response from jurisdiction to jurisdiction must encompass many elements, some of which, while having significant impact, are not readily measurable nor applicable pervasively among all locales. Geographic and demographic factors specific to each jurisdiction must be considered and applied if crime assessment is to approach completeness and accuracy. There are several sources of information which may assist the responsible researcher. The U.S. Bureau of the Census data, for example, can be utilized to better understand the makeup of a locale's population. The transience of the population, its racial and ethnic makeup, its composition by age and gender, education levels, and prevalent family structures are all key factors in assessing and better understanding the crime issue.

The National League of Cities provides information regarding the economic and cultural makeup of cities and counties. Understanding a jurisdiction's industrial/economic base, its dependence upon neighboring jurisdictions, its transportation system, its economic dependence on nonresidents (such as tourists and convention attendees), its proximity to military reservations, etc., all help in better gauging and interpreting the crime known to and reported by law enforcement. More detailed information can, of course, be obtained from a city's or county's chamber of commerce, planning/information office, or other similar entity.

The strength (personnel and other resources) and the aggressiveness of a jurisdiction's law enforcement agency are also key factors. While information pertaining to the number of sworn and civilian law enforcement employees can be found in this publication, assessment of the law enforcement emphases is, of course, much more difficult. For example, one city may report more crime than a comparable one, not because there is more crime, but rather because its law enforcement agency through proactive efforts, such as "sting operations," identifies more offenses. Attitudes of the citizens toward crime and their crime reporting practices, especially concerning more minor offenses, have an impact on the volume of crimes known to police.

It is incumbent upon all data users to become as well educated as possible about how to categorize and quantify the nature and extent of crime in the United States and in any of the over 16,000 jurisdictions represented by law enforcement contributors to this Program. Valid assessments are only possible with careful study and analysis of the various unique conditions affecting each local law enforcement jurisdiction.

Historically, the causes and origins of crime have been the subjects of investigation by varied disciplines. Some factors which are known to affect the volume and type of crime occurring from place to place are:

Population density and degree of urbanization with size of locality and its surrounding area.
Variations in composition of the population, particularly youth concentration.
Stability of population with respect to residents' mobility, commuting patterns, and transient factors.
Modes of transportation and highway system.
Economic conditions, including median income, poverty level, and job availability.
Cultural factors and educational, recreational, and religious characteristics.
Family conditions with respect to divorce and family cohesiveness.
Climate.
Effective strength of law enforcement agencies.
Administrative and investigative emphases of law enforcement.
Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
Citizens' attitudes toward crime.
Crime reporting practices of the citizenry.

The Uniform Crime Reports give a nationwide view of crime based on statistics contributed by state and local law enforcement agencies. Population size is the only correlate of crime utilized in this publication. While the other factors listed above are of equal concern, no attempt is made to relate them to the data presented. *The reader is, therefore, cautioned against comparing statistical data of individual reporting units from cities, counties, metropolitan areas, states, or colleges and universities solely on the basis of their population coverage or student enrollment.*

Data users are cautioned against comparisons of crime trends presented in this report and those estimated by the National Crime Victimization Survey (NCVS), administered by the Bureau of Justice Statistics. Because of differences in methodology and crime coverage, the two programs examine the Nation's crime problem from somewhat different perspectives, and their results are not strictly comparable. The definitional and procedural differences can account for many of the apparent discrepancies in results from the two programs. Appendix IV, "The Nation's Two Crime Measures," contains a detailed description of the NCVS and UCR.

SECTION I

Summary of the Uniform Crime Reporting Program

The Uniform Crime Reporting (UCR) Program is a nationwide, cooperative statistical effort of over 16,000 city, county, and state law enforcement agencies voluntarily reporting data on crimes brought to their attention. During 1992, law enforcement agencies active in the UCR Program represented over 242 million United States inhabitants or 95 percent of the total population as established by the Bureau of the Census. The coverage amounted to 97 percent of the United States population living in Metropolitan Statistical Areas (MSAs), 90 percent of the population in cities outside metropolitan areas, and 86 percent of the rural population.

Since 1930, the FBI has administered the Program and issued periodic assessments of the nature and type of crime in the Nation. While the Program's primary objective is to generate a reliable set of criminal statistics for use in law enforcement administration, operation, and management, its data have over the years become one of the country's leading social indicators. The American public looks to UCR for information on fluctuations in the level of crime, while criminologists, sociologists, legislators, municipal planners, the press, and other students of criminal justice use the statistics for varied research and planning purposes.

Historical Background

Recognizing a need for national crime statistics, the International Association of Chiefs of Police (IACP) formed the Committee on Uniform Crime Records in the 1920s to develop a system of uniform police statistics. Establishing offenses known to law enforcement as the appropriate measure, the Committee evaluated various crimes on the basis of their seriousness, frequency of occurrence, pervasiveness in all geographical areas of the country, and likelihood of being reported to law enforcement. After studying state criminal codes and making an evaluation of the recordkeeping practices in use, the Committee in 1929 completed a plan for crime reporting which became the foundation of the UCR Program.

Seven offenses were chosen to serve as an Index for gauging fluctuations in the overall volume and rate of crime. Known collectively as the Crime Index, these offenses included the violent crimes of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault and the property crimes of burglary, larceny-theft, and motor vehicle theft. By congressional mandate, arson was added as the eighth Index offense in 1979.

During the early planning of the Program, it was recognized that the differences among criminal codes precluded a mere aggregation of state statistics to arrive at a national total. Further, because of the variances in punishment for the same offenses in different state codes, no distinction between felony and misdemeanor crimes was possible. To avoid these problems and provide nationwide uniformity in crime reporting, standardized offense definitions by which law enforcement agencies were to submit data, without regard for local statutes, were formulated. The definitions used by the Program are set forth in Appendix II of this publication.

In January, 1930, 400 cities representing 20 million inhabitants in 43 states began participating in the UCR Program. Congress enacted Title 28, Section 534, of the United States Code authorizing the Attorney General to gather crime information that same year. The Attorney General, in turn, designated the FBI to serve as the national clearinghouse for the data collected. Since that time, data based on uniform classifications and procedures for reporting have been obtained from the Nation's law enforcement agencies.

Advisory Groups

Providing vital links between local law enforcement and the FBI in the conduct of the UCR Program are the IACP and the National Sheriffs' Association (NSA). The IACP's Committee on Uniform Crime Records, as it has since the Program began, represents the thousands of police departments nationwide. The NSA's Committee on Uniform Crime Reporting, established in June, 1966, encourages sheriffs throughout the country to participate fully in the Program. Both committees serve in advisory capacities concerning the UCR Program's operation.

To function in an advisory capacity concerning UCR policy and provide suggestions on UCR data usage, a Data Providers' Advisory Policy Board was established in August, 1988. The Board is comprised of 20 city, county, and state law enforcement executives, representing the four geographic regions of the Nation.

The Association of State Uniform Crime Reporting Programs and committees on UCR within individual state law enforcement associations are also active in promoting interest in the UCR Program. These organizations foster widespread and more intelligent use of uniform crime statistics and lend assistance to contributors when the needs arise.

Redesign of UCR

While throughout the years the UCR Program remained virtually unchanged in terms of the data collected and disseminated, a broad utility had evolved for UCR by the 1980s. Recognizing the need for improved statistics, law enforcement called for a thorough evaluative study that would modernize the UCR Program. The FBI fully concurred with the need for an updated Program and lent its complete support, formulating a comprehensive three-phase redesign effort. The Bureau of Justice Statistics (BJS), the Department of Justice agency responsible for funding criminal justice information projects, agreed to underwrite the first two phases. Conducted by an independent contractor, these phases were structured to determine what, if any, changes should be made to the current Program. The third phase would involve implementation of the changes identified. Abt Associates Inc. of Cambridge, Massachusetts, overseen by the FBI, BJS, and a Steering Committee comprised of prestigious individuals representing a myriad of disciplines, commenced the first phase in 1982.

During the first phase, the historical evolution of the Program was examined. All aspects of the Program, including the objectives and intended user audience, data items, reporting mechanisms, quality control, publications and user services, and relationships with other criminal justice data systems, were studied.

Early in 1984, a conference on the future of UCR, held in Elkridge, Maryland, launched the second phase of the study, which would examine potential futures for UCR and conclude with a set of recommended changes. Attendees at this conference reviewed work conducted during the first phase and discussed the potential changes that should be considered during phase two.

Findings from the evaluation's first phase and input on alternatives for the future were also major topics of discussion at the seventh National UCR Conference in July, 1984. Overlapping phases one and two was a survey of law enforcement agencies.

Phase two ended in early 1985 with the production of a draft "Blueprint for the Future of the Uniform Crime Reporting Program." The study's Steering Committee reviewed the draft report at a March, 1985, meeting and made various recommendations for revision. The Committee members, however, endorsed the report's concepts.

In April, 1985, the phase two recommendations were presented at the eighth National UCR Conference. While various considerations for the final report were set forth, the overall concept for the revised Program was unanimously approved. The joint IACP/NSA Committee on UCR also issued a resolution endorsing the Blueprint.

The final report, the "Blueprint for the Future of the Uniform Crime Reporting Program," was released in the summer of 1985. It specifically outlined recommendations for an expanded, improved UCR Program to meet informational needs into the next century. There were three recommended areas of enhancement to the UCR Program. First, reporting of offenses and arrests would be made by means of an incident-based system. Second, collection of data would be accomplished on two levels. Agencies in level one would report important details about those offenses comprising the current Crime Index, their victims, and arrestees. Law enforcement agencies covering populations of over 100,000 and a sampling of smaller agencies would be included in level two, which would collect expanded detail on all significant offenses. The third proposal involved introducing a quality assurance program.

One of the first actions taken by the FBI to begin implementation was to award a contract for the development of new offense definitions and data elements for the redesigned system. The work involved: (a) revision of the definitions of certain Index offenses; (b) identification of additional significant offenses to be reported; (c) refining definitions for both; and (d) development of data elements (incident details) for all UCR offenses in order to fulfill the requirements of incident-based reporting versus the current summary reporting.

Concurrent with the preparation of the data elements, the FBI studied the various state systems to select an experimental site for implementation of the redesigned Program. In view of its long-standing incident-based Program and well-established staff dedicated solely to UCR, the South Carolina Law Enforcement Division (SLED) was chosen. The SLED agreed to adapt its existing system to meet the requirements of the redesigned Program and collect data on both offenses and arrests relating to the newly defined offenses.

To assist SLED in conducting the pilot project, offense definitions and data elements developed under the private contract were put at the staff's disposal. Also, the FBI's Technical Services Division developed "Automated Data Capture Specifications" for use in adapting the state's data processing procedures to incorporate the revised system. The BJS supplied funding to facilitate needed software revisions. Testing of the new Program was completed in late 1987.

Following the completion of the pilot project conducted by SLED, the FBI produced a draft set of guidelines for an enhanced UCR Program. Law enforcement executives from around the country were then invited to a conference in Orange Beach, Alabama, where the guidelines were presented for final review.

During the conference, three overall endorsements were passed without dissent. First, that there be established a new, incident-based national crime reporting system; second, that the FBI manage this Program; and third, that an Advisory Policy Board composed of law enforcement executives be formed to assist in the direction and implementation of the new Program.

Information about the redesigned UCR Program, called the National Incident-Based Reporting System or NIBRS, is contained in four documents produced subsequent to the Orange Beach Conference. Volume 1, *Data Collection Guidelines,* contains a system overview and description of the offenses, offense codes, reports, data elements, and data values used in the system. Volume 2, *Data Submission Specifications,* is for the use of state and local systems personnel who are responsible for preparing magnetic tapes/floppy disks/etc., for submission to the FBI. Volume 3, *Approaches to Implementing an Incident-Based Reporting (IBR) System,* is for use by computer programmers, analysts, etc., responsible for developing a state or local IBR system which will meet NIBRS' reporting requirements. Volume 4, *Error Message Manual,* contains designations of mandatory and optional data elements, data element edits, and error messages.

A new NIBRS edition of the UCR Handbook has been produced to assist law enforcement agency data contributors implementing NIBRS within their departments. This document is geared toward familiarizing local and state law enforcement personnel with the definitions, policies, and procedures of NIBRS. It does not contain the technical coding and data transmission requirements presented in Volumes 1 through 4.

NIBRS will collect data on each single incident and arrest within 22 crime categories. For each offense known to police within these categories, incident, victim, property, offender, and arrestee information will be gathered when available. The goal of the redesign is to modernize crime information by collecting data presently maintained in law enforcement records; the enhanced UCR Program is, therefore, a byproduct of current records systems. The integrity of UCR's long-running statistical series will, of course, be maintained.

It became apparent during the development of the prototype system that the level one and level two reporting proposed in the "Blueprint" may not be the most practical approach. Many state and local law enforcement administrators indicated that the collection of data on all pertinent offenses could be handled with more ease than could the extraction of selected ones. While "Limited" participation, equivalent to the "Blueprint's" level one, will remain an option, it appears that most reporting jurisdictions, upon implementation, will go immediately to "Full" participation, meeting all NIBRS data submission requirements.

The implementation of NIBRS will be at a pace commensurate with the resources, abilities, and limitations of the contributing law enforcement agencies. The FBI was able to accept NIBRS data as of January, 1989, and six state-level UCR Programs (Alabama, Colorado, Idaho, Iowa, North Dakota, and South Carolina) are now supplying data in the NIBRS format. An additional 15 state agencies, as well as two local law enforcement agencies in non-Program states and one Federal agency (the FBI), have submitted test tapes or disks containing the expanded data. Nineteen other state UCR Programs and agencies in the District of Columbia and Guam are in various stages of planning and development, with eight of those expected to submit test tapes during 1993.

Recent Developments

HATE CRIME STATISTICS—The Hate Crime Statistics Act, passed by the U. S. Congress and signed by the President in April, 1990, mandates a 5-year data collection of crimes motivated by religious, ethnic, racial, or sexual-orientation prejudice. Collection commenced January 1, 1991, and the UCR Program has distributed hate crime *Data Collection Guidelines* and *Training Guides* to city, county, and state law enforcement agencies. Training sessions on hate crime reporting procedures have been held across the Nation for Federal, state, and local law enforcement agencies. A 1990 hate crime *Resource Book,* which addresses hate crime data maintained by certain states and local agencies under their own hate crime programs prior to passage of the Federal legislation, has been disseminated. Also released was an initial hate crime report which provides limited data based on information collected by the FBI for 1991, the first year of the data collection.

KILLED IN THE LINE OF DUTY—A special report on officers feloniously killed was published recently and is available to all interested parties. The study examined extensively 51 distinct cases involving the felonious killings of 54 law enforcement officers by 50 offenders to attempt a better understanding of the nature of these fatal attacks. A followup study entitled "Violence Against Law Enforcement Officers" is planned under a grant from the National Institute of Justice. It will examine selected incidents of serious assault by *cutting instrument or firearm* where the victim officer *survived* the incident.

UCR JOINS CJIS DIVISION—UCR was administratively reorganized and became part of the Criminal Justice Information Services (CJIS) Division in 1992. Future plans include relocation of the CJIS Division to Clarksburg, West Virginia.

The Crime Clock should be viewed with care. Being the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

SECTION II

Crime Index Offenses Reported

CRIME INDEX TOTAL

DEFINITION

The Crime Index is composed of selected offenses used to gauge fluctuations in the overall volume and rate of crime reported to law enforcement. The offenses included are the violent crimes of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault and the property crimes of burglary, larceny-theft, motor vehicle theft, and arson.

TREND

Year	*Number of offenses*[1]	*Rate per 100,000 inhabitants*[1]
1991	*14,872,883*	*5,897.8*
1992	*14,438,191*	*5,660.2*
Percent change	*−2.9*	*−4.0*

---

[1] Does not include arson. See page 57.

The Crime Index total dropped 3 percent to nearly 14.5 million offenses in 1992, the first decline recorded since 1984. In the cities collectively and the suburban counties, the Index was also down 3 percent from 1991, while the rural counties registered a 1-percent decrease. This downward trend was evident in all city population groups with those having a million or more inhabitants showing the largest decrease, 8 percent. Five- and 10-year percent changes showed the 1992 national experience was 4 percent above the 1988 level and 19 percent higher than in 1983.

Geographically, the largest volume of Crime Index offenses was reported in the most populous Southern States, which accounted for 38 percent of the total. Following were the Western States with 24 percent, the Midwestern States with 21 percent, and the Northeastern States with 17 percent. All regions except the West showed Crime Index decreases from 1991 to 1992. (See Table 4.)

Seasonality figures show Crime Index offenses occurred most frequently in the month of August and least often in February. (See Chart 2.2.)

Table 2.1—Crime Index Total by Month, 1988-1992

[Percent distribution]

Months	1988	1989	1990	1991	1992
January	7.8	8.2	8.3	7.9	8.3
February	7.5	7.2	7.4	7.4	7.8
March	8.1	8.2	8.2	8.1	8.2
April	7.7	7.8	7.9	8.0	8.0
May	8.2	8.5	8.3	8.4	8.3
June	8.3	8.5	8.3	8.5	8.4
July	9.0	9.2	8.9	9.1	9.0
August	9.5	9.3	9.1	9.2	9.0
September	8.6	8.4	8.4	8.4	8.4
October	8.7	8.7	8.7	8.7	8.5
November	8.3	8.1	8.2	8.0	8.0
December	8.5	7.9	8.6	8.3	8.1

Rate

Crime rates relate the incidence of crime to population. Nationwide in 1992, there were an estimated 5,660 Crime Index offenses for each 100,000 in population. The Crime Index rate was highest in metropolitan areas and lowest in rural counties. (See Table 2.) While the national 1992 Crime Index rate fell 4 percent from 1991, it showed virtually no change from the 1988 level and was 9 percent above the 1983 total.

Regionally, the Crime Index rates ranged from 6,388 in the West to 4,837 in the Northeast. The 2-year percent changes (1992 versus 1991) showed declines in all regions. (See Table 4.)

Nature

The Crime Index is composed of violent and property crime categories, and in 1992, 13 percent of the Index offenses reported to law enforcement were violent crimes and 87 percent, property crimes. Larceny-theft was the offense with the highest volume, while murder accounted for the fewest offenses. (See Chart 2.4.)

Property estimated in value at $15.8 billion was stolen in connection with all Crime Index offenses, with the largest losses due to thefts of motor vehicles; jewelry and precious metals; and televisions, radios, stereos, etc. Law enforcement agencies nationwide recorded a 36-percent recovery rate for dollar losses in connection with stolen property. The highest recovery percentages were for stolen motor vehicles, consumable goods, livestock, clothing and furs, and firearms. (See Table 24.)

Law Enforcement Response

Law enforcement agencies nationwide recorded a 21-percent clearance rate for the collective Crime Index offenses in 1992 and made an estimated 2.9 million arrests for Index crimes. Crimes can be cleared by arrest or by exceptional means when some element beyond law enforcement control precludes the placing of formal charges against the offender. The arrest of one person may clear several crimes, or several persons may be arrested in connection with the clearance of one offense.

The Index clearance rate has remained relatively stable throughout the past 10-year period. As in 1992, the clearance rates in both 1988 and 1983 were 21 percent.

Total Crime Index arrests, as well as those of adults, dropped 2 percent in 1992 when compared to 1991. During the same time period, juvenile (persons under 18) arrests for the Index were up 1 percent, and those of persons under age 15 increased 2 percent. In fact, juvenile arrests increased over 1991 for all offenses except burglary and motor vehicle theft, for which arrest volumes were down 1 and 4 percent, respectively. Adult arrests declined for all offenses with the exception of aggravated assault which showed a 4-percent increase, 1992 versus 1991.

Considering the individual offenses composing the Index, only aggravated assault and arson showed increases in arrest totals from 1991 to 1992. Decreases for the remaining Index offenses ranged from 1 percent for forcible rape to 5 percent for murder.

As in past years, larceny-theft arrests accounted for the highest volume of Crime Index arrests at 1.5 million. (See Table 29.)

VIOLENT CRIME TOTAL

DEFINITION

Violent crime is composed of four offenses: murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault. All violent crimes involve force or threat of force.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1991	*1,911,767*	*758.1*
1992	*1,932,274*	*757.5*
Percent change	*+1.1*	*−.1*

Violent crimes reported to law enforcement during 1992 exceeded 1.9 million offenses, increasing 1 percent over 1991. The annual estimated total was 23 percent above the 1988 level, and 54 percent above that of 1983. From 1991 to 1992, rural and suburban counties recorded increases of 6 and 2 percent, respectively, while the Nation's cities collectively recorded less than a 1-percent increase.

Regionally, the South, the most populous region, accounted for 37 percent of all violent crimes reported in 1992. Lesser volumes of 25 percent for the West and 19 percent for both the Northeast and Midwest were recorded. Two of the four regions registered increases in the numbers of violent crimes reported from 1991 to 1992. The Western States experienced a 5-percent increase and the Southern States, a 3-percent rise. In the Northeastern and Midwestern States, declines of 2 and 3 percent, respectively, were recorded. (See Table 4.)

Violent crimes occur more frequently in the summer months, while the lowest totals are experienced during the winter. (See Chart 2.6.)

November	8.0	8.4	7.9	8.0	7.8
December	8.3	8.2	8.4	8.2	8.0

Rate

A violent crime rate of 758 per 100,000 inhabitants was registered nationwide in 1992. Two-, 5-, and 10-year trends showed the 1992 rate was virtually the same as the 1991 rate but was 19 percent above the 1988 rate and 41 percent above the 1983 figure. The violent crime rate was highest in the Nation's cities, which collectively registered 999 offenses per 100,000 population. The suburban counties' rate was 476, and for rural counties, it was 226.

The Western States registered the highest overall violent crime rate per 100,000 inhabitants, 864, and the Midwestern States the lowest, 607. Among the geographic regions, both the Northeast and Midwest experienced rate declines, 3 and 4 percent, respectively. The increases in the other regions were 3 percent in the West and 1 percent in the South. (See Table 4.)

Nature

Aggravated assaults accounted for 58 percent of the violent crimes reported to law enforcement during 1992. Robberies comprised 35 percent; forcible rapes, 6 percent; and murders, 1 percent.

While data concerning weapons used in connection with forcible rape are not collected, firearms were the weapons used in 31 percent of all murders, robberies, and aggravated assaults, collectively, in 1992. Personal weapons (hands, fists, feet, etc.) were used in another 31 percent; knives or cutting instruments were used in 15 percent; and other dangerous weapons in 23 percent. The proportion of violent crimes committed with firearms has increased in recent years. In 1988, firearms were employed in the commission of 26 percent of violent offenses.

Law Enforcement Response

The 1992 violent crime clearance rate was 45 percent, the same as in 1991. Among the violent offenses, the clearance rates ranged from 65 percent for murder to 24 percent for robbery.

There were an estimated 742,130 persons arrested for violent crimes in 1992. Violent crime arrests accounted for 5 percent of the total arrests for all offenses and 26 percent of those for Index crimes. Males made up 88 percent of all violent crime arrestees and whites, 54 percent. (See Tables 42 and 43.)

Total arrests for violent crimes rose 2 percent from 1991 to 1992. Adult arrests also showed a 2-percent increase, while juvenile arrests (under age 18) increased 5 percent. Overall violent crime arrests were up 2 percent in the Nation's cities, 1 percent in suburban counties, and 7 percent in rural counties from 1991 to 1992. (See Section IV, Persons Arrested.)

VIOLENT CRIME

CHART 2.6

VARIATION FROM MONTHLY AVERAGE 1992

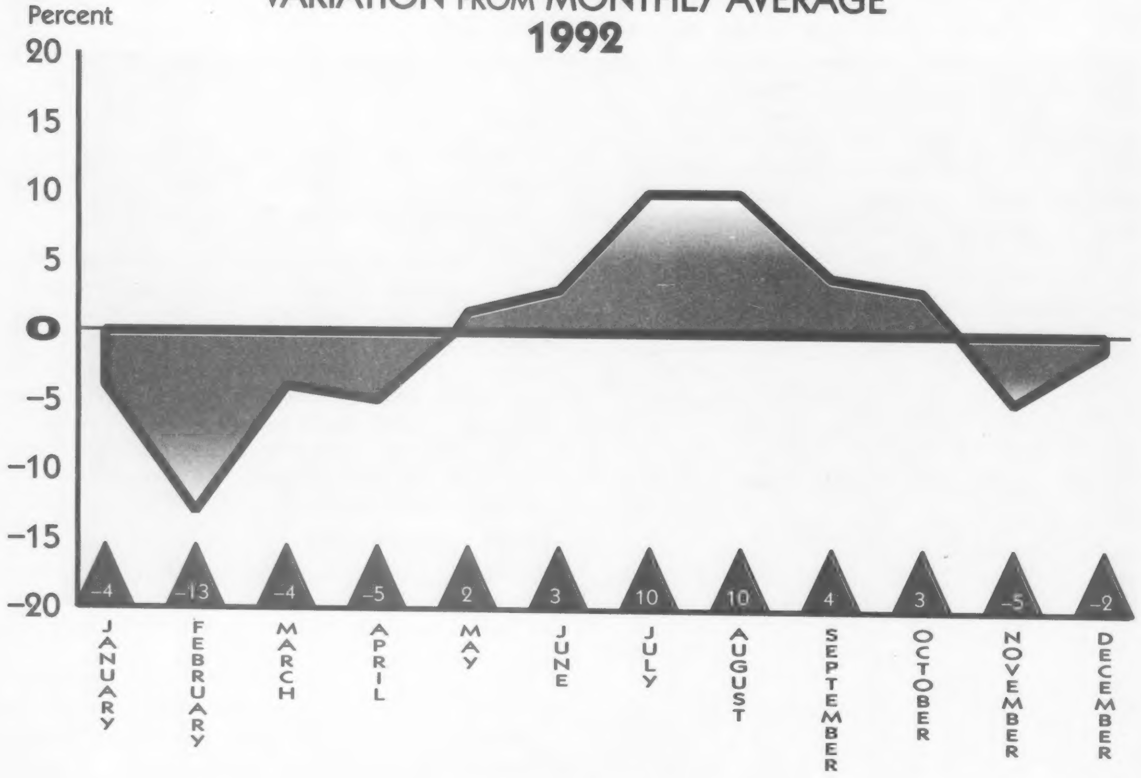

CHART 2.7

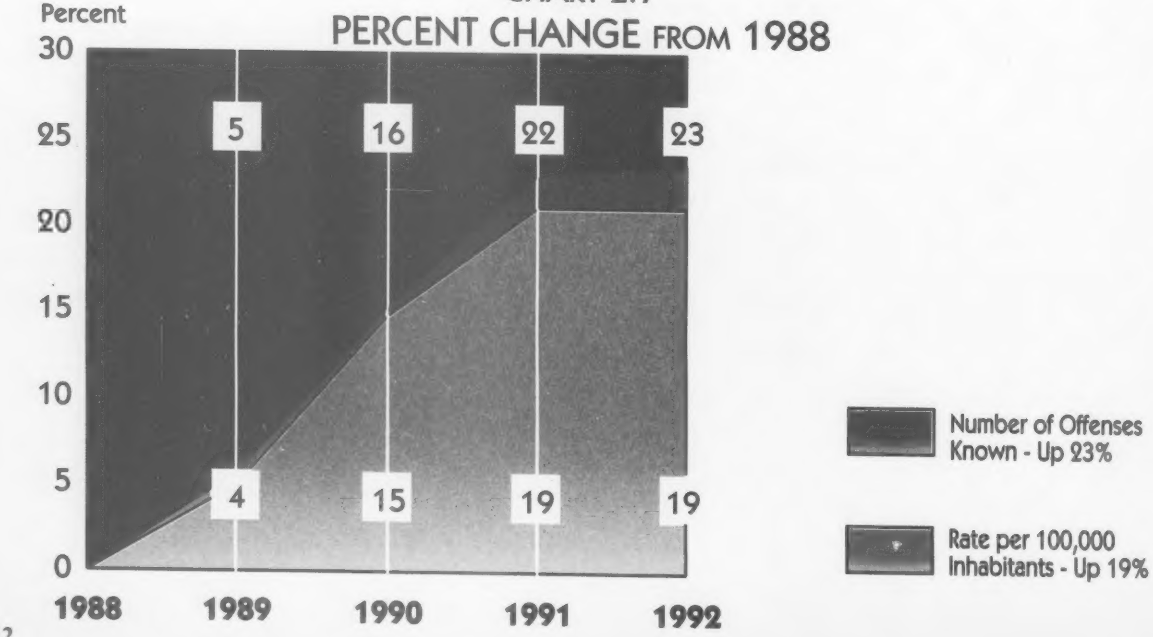
PERCENT CHANGE FROM 1988



MURDER AND NONNEGLIGENT MANSLAUGHTER

DEFINITION

Murder and nonnegligent manslaughter, as defined in the Uniform Crime Reporting Program, is the willful (nonnegligent) killing of one human being by another.

The classification of this offense, as for all other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides; and attempts to murder or assaults to murder, which are scored as aggravated assaults.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1991	*24,703*	*9.8*
1992	*23,760*	*9.3*
Percent change	*−3.8*	*−5.1*

The total number of murders in the United States during 1992 was estimated at 23,760. Monthly figures show that more persons were murdered in August in 1992, while the fewest were killed during February. (See Chart 2.8.)

Table 2.3—Murder by Month, 1988-1992

[Percent distribution]

Months	1988	1989	1990	1991	1992
January	8.2	8.1	7.9	8.0	8.1
February	7.2	7.1	7.0	7.0	7.5
March	7.7	7.8	8.0	7.7	8.2
April	7.7	7.9	7.4	7.8	8.0
May	7.8	7.8	8.1	8.1	8.5
June	7.7	8.2	8.4	8.6	7.9
July	8.9	9.1	9.6	9.1	9.1
August	9.5	9.0	9.3	9.4	9.1
September	8.9	8.8	9.2	8.8	8.7
October	8.9	8.9	8.8	8.6	8.0
November	8.2	8.5	7.6	7.8	8.1
December	9.2	8.7	8.8	9.0	8.8

When viewing the four regions of the Nation, the Southern States, the most populous region, accounted for 41 percent of the murders. The Western States reported 23 percent; the Midwestern States, 20 percent; and the Northeastern States, 17 percent. Among the regions, only the Western States registered an increase from 1991 to 1992, 3 percent. (See Table 4.)

The murder volume was down 4 percent nationwide in 1992 from 1991. In the Nation's cities overall, murder decreased 5 percent, with the greatest decline—12 percent—registered in cities with populations of 50,000 to 99,999. The suburban counties recorded a 3-percent drop in their murder volumes and the rural counties, an 8-percent decrease for the 2-year period. (See Table 12.)

The accompanying chart reveals a 15-percent rise nationally in the murder counts from 1988 to 1992. The 10-year trend showed the 1992 total 23 percent above the 1983 level.

Rate

Down 5 percent from the 1991 rate, the national murder rate in 1992 was 9 per 100,000 inhabitants. Five- and 10-year trends showed the 1992 rate was 11 percent higher than in 1988 and 12 percent above the 1983 rate.

On a regional basis, the South averaged 11 murders per 100,000 people; the West, 10 per 100,000; and the Northeast and Midwest, 8 per 100,000. Compared to 1991, murder rates in 1992 declined in three of the four geographic regions with the only increase in the West, 1 percent. (See Table 4.)

The Nation's metropolitan areas reported a 1992 murder rate of 10 victims per 100,000 inhabitants. In the rural counties and in cities outside metropolitan areas, the rate was 5 per 100,000.

[1] Does not include unknown ages.

Nature

Supplemental data provided by contributing agencies recorded information for 22,540 of the estimated 23,760 murders in 1992. Submitted monthly, the data consist of the age, sex, and race of both victims and offenders; the types of weapons used; the relationships of victims to the offenders; and the circumstances surrounding the murders.

Table 2.6—Victim/Offender Relationship by Age, 1992

[Single Victim/Single Offender]

Age of Victim	Age of Offender			
	Total	Under 18	18 and over	Unknown
Total	11,250	1,121	9,621	508
Under 18	1,306	339	914	53
18 and over	9,851	779	8,640	432
Unknown	93	3	67	23

Based on this information, 78 percent of the murder victims in 1992 were male; and 88 percent were persons 18 years of age or older. Forty-seven percent were aged 20 through 34 years. Considering victims for whom race was known, an average of 50 of every 100 were black, 48 were white, and the remainder were persons of other races.

Supplemental data were also reported for 25,180 murder offenders in 1992. Of those for whom sex and age were reported, 90 percent were males, and 86 percent were persons 18 years of age or older. Seventy-six percent were aged 15 through 34 years. Of offenders for whom race was known, 55 percent were black, 43 percent were white, and the remainder were persons of other races.

Data based on incidents involving one victim and one offender showed that in 1992, 94 percent of the black murder victims were slain by black offenders, and 83 percent of the white murder victims were killed by white offenders. Likewise, males were most often slain by males (87 percent in single victim/single offender situations). These same data showed, however, that 9 of every 10 female victims were murdered by males.

As in previous years, firearms were the weapons used in approximately 7 of every 10 murders committed in the United States. Of those murders for which weapons were reported, 55 percent were by handguns, 5 percent by shotguns, and 3 percent by rifles. Other or unknown types of firearms accounted for another 5 percent of the total murders. Among the remaining weapons, cutting or stabbing instruments were employed in 14 percent of the murders; blunt objects (clubs, hammers, etc.) in 5 percent; personal weapons (hands, fists, feet, etc.) in another 5 percent; and other dangerous weapons, such as poison, explosives, etc., in the remainder. A state-by-state breakdown of weapons used in connection with murder is shown in Table 20.

Table 2.7—Victim/Offender Relationship by Race and Sex[1], 1992

[Single Victim/Single Offender]

Race of Victim	Race of Offender				Sex of Offender		
	White	Black	Other	Unknown	Male	Female	Unknown

Total Unknown Race	14	16	1	33	27	4	33

Sex of Victim	Race of Offender				Sex of Offender		
	White	Black	Other	Unknown	Male	Female	Unknown
Total Male Victims	3,413	4,731	150	100	7,276	1,018	100
Total Female Victims	1,442	1,253	65	32	2,500	260	32
Total Unknown Sex	14	16	1	33	27	4	33

[1] Data based on 11,250 incidents.

Almost half of the murder victims in 1992 were either related to (12 percent) or acquainted with (35 percent) their assailants. Fourteen percent of the victims were murdered by strangers, while the relationships among victims and offenders were unknown for 39 percent of the murders. Among all female murder victims in 1992, 29 percent were slain by husbands or boyfriends. Four percent of the male victims were killed by wives or girlfriends.

Arguments resulted in 29 percent of the murders during the year. Twenty-two percent occurred as a result of felonious activities such as robbery, arson, etc., while another 1 percent were suspected to have been the result of some felonious activity. Three percent of the murders were committed during brawls while offenders were under the influence of alcohol or narcotics. Table 2.13 shows murder circumstances for the past 5 years.

Table 2.8—Murder, Type of Weapons Used, 1992

[Percent distribution by region]

Law Enforcement Response

The clearance rate for murder continued to be higher than for any other Crime Index offense. Law enforcement agencies nationwide recorded a 65-percent clearance rate for 1992. Seventy-five percent of murders in rural counties, 67 percent of those in suburban counties, and 64 percent of those in the Nation's cities were cleared. Cities with populations under 10,000 reported the most successful clearance rate, 78 percent. (See Table 25.)

Geographically, the South, the most populous region, registered the highest murder clearance rate, 70 percent. Following were the Northeastern States with 67 percent, the Western States with 60 percent, and the Midwestern States with 55 percent.

Persons under 18 years of age accounted for 9 percent of the willful killings cleared by law enforcement nationally, as well as in the Nation's cities. Eight percent of the suburban county and 7 percent of the rural county clearances involved only persons in this young-age group. This proportion of juvenile involvement was lower than for any other Index offense.

Fifty-five percent of all murder arrestees in 1992 were under 25 years of age. The 18- to 24-year age group accounted for 41 percent of the total. (See Table 38.)

Ninety percent of those arrested were males and 10 percent, females. Blacks comprised 55 percent of the total arrestees for murder in 1992. Whites made up 43 percent, and the remainder were of other races.

Compared to the 1991 level, the 1992 murder arrest total decreased 5 percent. Arrests of persons aged 18 and over declined 6 percent, while those of younger persons showed virtually no change. During the same 2-year period, female arrests were down 10 percent and male arrests dropped 4 percent.

Long-term trends indicate the 1992 murder arrest total was 13 percent above the 1988 level and 18 percent higher than the 1983 figure.

Justifiable Homicide

Certain willful killings are classified as justifiable or excusable, based on law enforcement investigation. In Uniform Crime Reporting, justifiable homicide is defined as and limited to the killing of a felon by a law enforcement officer in the line of duty, or the killing of a felon, during the commission of a felony, by a private citizen. These offenses are tabulated independently and are not included in the murder counts.

In 1992, the justifiable homicide total was 763, up 9 percent from the 1991 total of 698 and 31 percent higher than the 1988 total of 581. Of the justifiable homicides in 1992, 415 involved law enforcement officers and 348 were by private citizens. Data on weapons used in connection with justifiable homicide showed that handguns were the weapons used most often. (See Tables 2.15 and 2.16.)

Table 2.15—Justifiable Homicide by Weapon, Law Enforcement,[1] 1988-1992

[1] The killing of a felon, during the commission of a felony, by a private citizen.

FORCIBLE RAPE

DEFINITION

Forcible rape, as defined in the Program, is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are excluded.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1991	*106,593*	*42.3*
1992	*109,062*	*42.8*
Percent change	*+2.3*	*+1.2*

An estimated 109,062 forcible rapes were reported to law enforcement agencies across the Nation during 1992. The 1992 total was 2 percent higher than the 1991 level. The accompanying chart (2.11) shows consecutive increases in volume for the last 5 years.

Geographically, 37 percent of the forcible rape total in 1992 was accounted for by the most populous Southern States, 25 percent by the Midwestern States, 24 percent by the Western States, and 14 percent by the Northeastern States. Two-year trends showed that all regions experienced volume increases over 1991 figures, ranging from 1 percent in the Midwest to 3 percent in the South. (See Table 4.)

The greatest numbers of forcible rapes were reported during the summer months. (See Chart 2.10.)

Rate

By Uniform Crime Reporting definition, the victims of forcible rape are always female. In 1992, an estimated 84 of every 100,000 females in the country were reported rape victims, an increase of 1 percent over the 1991 rate. Since 1988, the female forcible rape rate has risen 15 percent.

Female forcible rape rates for 1992 showed there were 90 victims per 100,000 females in MSAs, 73 per 100,000 females in cities outside metropolitan areas, and 49 per 100,000 females in rural counties. Although MSAs record the highest rape rates, they have shown the smallest change over the past 10 years. During this time, the greatest rate increase was shown in cities outside metropolitan areas, 78 percent. MSAs and rural areas showed lesser increases, 18 percent and 69 percent, respectively.

Regionally, in 1992, the highest female rape rate was in the Western States, which recorded 91 victims per 100,000 females. Following were the Southern States with a rate of 90, the Midwestern States with 89, and the Northeastern States with 58. Over the last 10 years, regional increases in the forcible rape rate were 48 percent in the Midwest, 34 percent in the South, 14 percent in the Northeast, and 6 percent in the West.

Nature

Rapes by force constitute the greatest percentage of total forcible rapes, 86 percent of the 1992 experience. The remainder were attempts or assaults to commit forcible rape. The number of rapes by force increased 3 percent in 1992 over the 1991 volume, while attempts to rape decreased 3 percent. Ten years of data show the percentage of rapes by force increasing.

As for all other Crime Index offenses, complaints of forcible rape made to law enforcement agencies are sometimes found to be false or baseless. In such cases, law enforcement agencies "unfound" the offenses and exclude them from crime counts. The "unfounded" rate, or percentage of complaints determined through investigation to be false, is higher for forcible rape than for any other Index crime. In 1992, 8 percent of forcible rape complaints were "unfounded," while the average for all Index crimes was 2 percent.

Law Enforcement Response

Nationwide, as well as in the cities, over half of the forcible rapes reported to law enforcement were cleared by arrest or exceptional means in 1992. Rural and suburban county law enforcement agencies cleared a slightly higher percentage of the offenses brought to their attention than did city law enforcement agencies. (See Table 25.)

Geographically, clearance rates for the regions were lowest in the Midwestern States and highest in the Southern States. (See Table 26.)

Of the total clearances for forcible rape in the country as a whole, 14 percent involved only persons under 18 years of age. The percentage of juvenile involvement varied by community type, ranging from 12 percent in the Nation's cities to 21 percent in suburban counties. (See Table 28.)

Law enforcement agencies nationwide made an estimated 39,100 arrests for forcible rape in 1992. Of the forcible rape arrestees, about 3 of every 10 were in the 18- to 24-year age group. Over half of those arrested were white. (See Tables 29, 38, and 43.)

The number of arrests for forcible rape fell 1 percent nationwide. Decreases of 2 percent were experienced in the Nation's cities and 4 percent in suburban counties from 1991 to 1992, while forcible rape arrests were up 7 percent in the rural counties. (See Tables 36, 44, 50, and 56.)

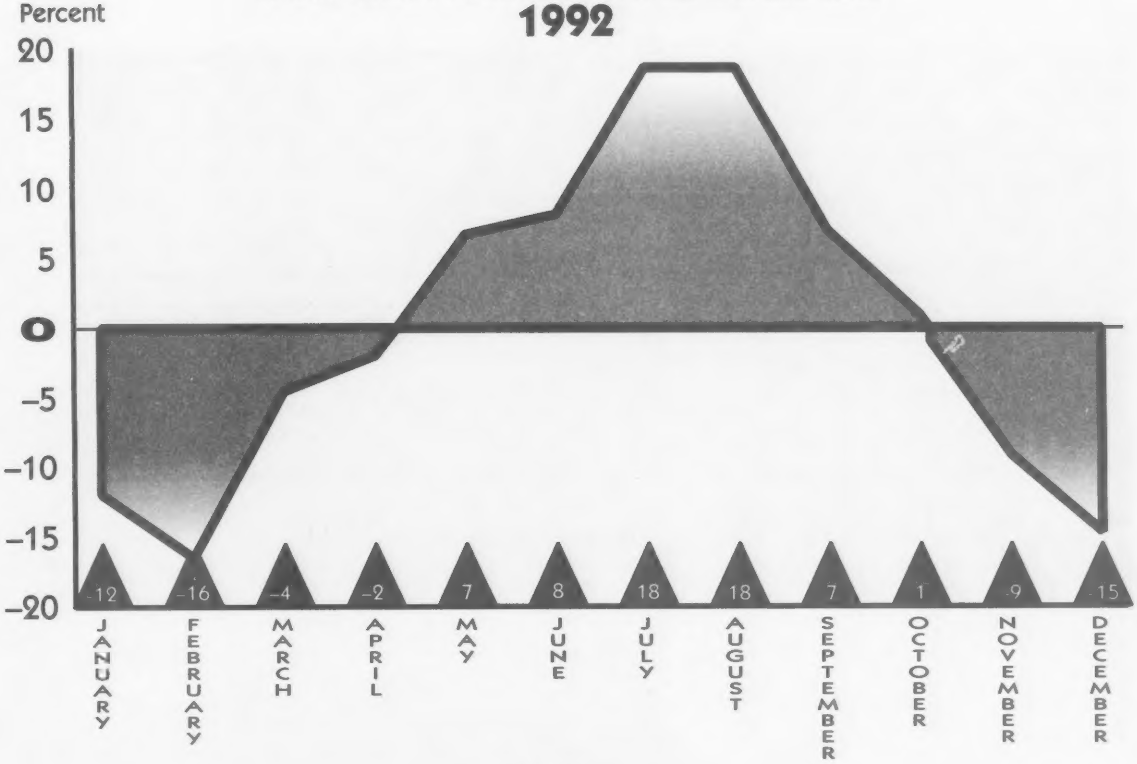

CHART 2.11

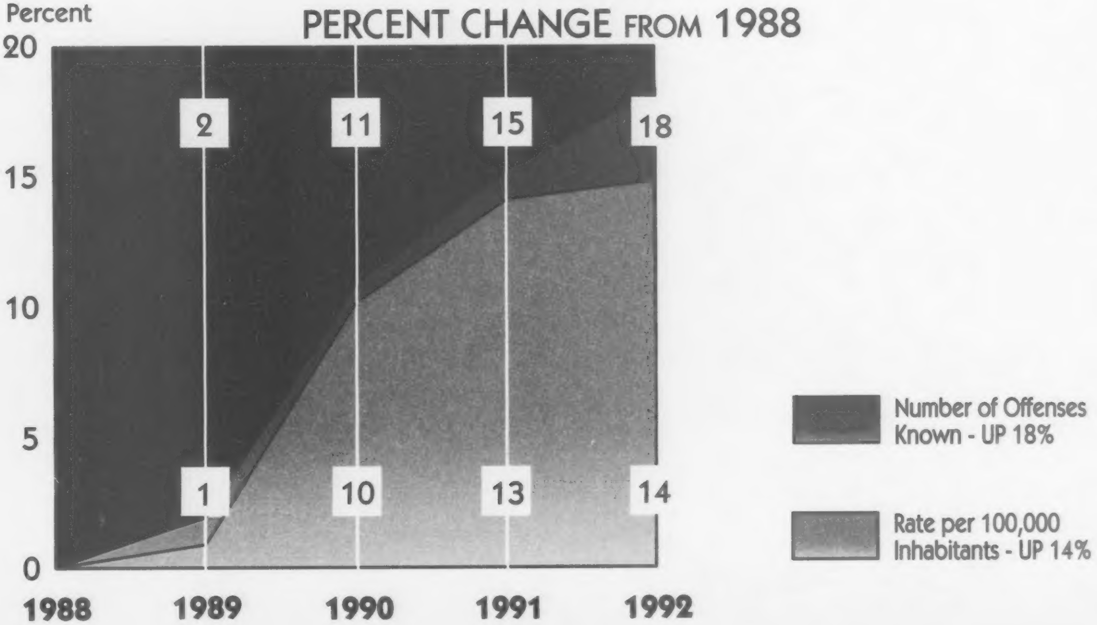
PERCENT CHANGE FROM 1988



ROBBERY

DEFINITION

Robbery is the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1991	*687,732*	*272.7*
1992	*672,478*	*263.6*
Percent change	*−2.2*	*−3.3*

Reported robberies in 1992 were estimated at 672,478 offenses, accounting for 5 percent of all Index crimes and 35 percent of the violent crimes. Robberies occurred most frequently in December and least often in April during 1992. (See Chart 2.12.)

Table 2.18—Robbery by Month, 1988-1992

[Percent distribution]

Months	1988	1989	1990	1991	1992
January	8.6	8.8	8.7	8.7	9.0
February	7.9	7.4	7.3	7.5	8.0
March	8.0	8.0	8.1	8.0	8.1
April	7.3	7.3	7.2	7.4	7.8
May	7.6	7.6	7.7	7.8	7.9
June	7.6	7.6	7.8	7.8	7.9
July	8.4	8.4	8.5	8.4	8.4
August	8.7	8.6	8.8	8.8	8.6
September	8.7	8.6	8.6	8.5	8.3
October	9.1	9.2	8.9	9.2	8.7
November	9.0	9.0	8.7	8.7	8.3
December	9.2	9.3	9.6	9.2	9.0

Nationally, the 1992 robbery volume was 2 percent lower than the 1991 level. This downward trend was also evident in the suburban counties and in cities overall, with 3-percent declines in each. Robberies were up 2 percent in the rural counties. (See Table 12.)

Distribution figures for the regions showed that the most populous Southern States registered 32 percent of all reported robberies. (See Table 3.) Two-year trends show the number of robberies in 1992 was down in three of the four regions as compared to 1991. The declines were 6 percent in the Midwest, 4 percent in the Northeast, and 3 percent in the South. The West showed a 5-percent increase during the same time period.

Chart 2.13 depicts the national trend in the robbery volume, as well as the robbery rate, for the years 1988-1992. In 1992, the number of robbery offenses was 24 percent higher than in 1988 and 33 percent above the 1983 total.

Rate

The national robbery rate in 1992 was 264 per 100,000 people, 3 percent lower than in 1991. In metropolitan areas, the 1992 rate was 323; in cities outside metropolitan areas, it was 70; and in the rural areas, it was 16. With 1,076 robberies per 100,000 inhabitants, the highest rate was recorded in cities with a million or more inhabitants. (See Tables 2 and 16.)

A comparison of 1991 and 1992 regional robbery rates per 100,000 inhabitants showed the Midwest's rate of 207 down 7 percent; the rates of 241 in the South and 336 in the Northeast each down 4 percent; and the West's rate of 295 up 3 percent.

Nature

In 1992, a total estimated national loss of $565 million was due to robberies. The value of property stolen during robberies averaged $840 per incident, up from $817 in 1991. Average dollar losses in 1992 ranged from $402 taken during robberies of convenience stores to $3,325 per bank robbery. (See Table 23.) The impact of this violent crime on its victims cannot be measured in terms of monetary loss alone. While the object of a robbery is to obtain money or property, the crime always involves force or threat of force, and many victims suffer serious personal injury.

As in previous years, robberies on streets or highways accounted for more than half (56 percent) of the offenses in this category. Robberies of commercial and financial establishments accounted for an additional 21 percent, and those occurring at residences, 10 percent. The remainder were miscellaneous types. From 1991 to 1992, bank robbery and miscellaneous robbery volumes each increased 1 percent. Decreases were experienced for all other robbery categories. (See Table 23.)

[1] Because of rounding, percentages may not add to totals.

Forty percent of all robberies in 1992 were committed through the use of strong-arm tactics and another 40 percent by firearms. Knives or cutting instruments were used in 11 percent, and other dangerous weapons in the remainder. A comparison of 1991 and 1992 robbery totals by weapon showed those by knives or cutting instruments dropped 9 percent; those by strong-arm tactics decreased 5 percent; and those by other dangerous weapons were down 1 percent. Robberies by firearms showed the only increase, up 2 percent. A state-by-state breakdown of weapons used in robberies in 1992 is shown in Table 21.

Western States	100.0	37.5	10.8	11.5	40.2

[1] Because of rounding, percentages may not add to totals.

Law Enforcement Response

The 1992 national robbery clearance rate was 24 percent nationwide, as well as in the cities collectively. Suburban county agencies cleared 27 percent, while the highest robbery clearance rate—38 percent—was registered by rural county law enforcement agencies. (See Table 25.) Regional robbery clearance percentages ranged from 27 percent in the South to 20 percent in the Midwest. (See Table 26.)

Nationally and in cities, persons under the age of 18 exclusively were the offenders in 16 percent of all 1992 robbery clearances. This age group accounted for 19 percent of the suburban county clearances and 13 percent of those by rural county agencies.

Arrests for robbery declined 1 percent nationwide during 1992 when compared to 1991. For the same 2-year period, the number of persons arrested for robbery was down 2 percent in the Nation's cities and decreased 3 percent in the suburban counties, but increased 14 percent in the rural counties.

Sixty-two percent of all robbery arrestees in 1992 were under 25 years of age, and 91 percent were males. Sixty-one percent of those arrested were black, 38 percent were white, and the remainder were of other races.

During the 5-year period, 1988-1992, the total number of robbery arrests, as well as arrests of males and females, increased 21 percent. Juvenile arrests rose 50 percent, and those of persons 18 years of age and older increased 13 percent.

AGGRAVATED ASSAULT

DEFINITION

Aggravated assault is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1991	*1,092,739*	*433.3*
1992	*1,126,974*	*441.8*
Percent change	*+3.1*	*+2.0*

Totaling an estimated 1,126,974 offenses nationally, aggravated assaults in 1992 accounted for 58 percent of the violent crimes. Geographic distribution figures show that 40 percent of the aggravated assault volume was accounted for by the most populous Southern Region, 25 percent by the Western Region, 19 percent by the Midwestern Region, and 16 percent by the Northeastern Region. Among the regions, the Northeast and Midwest registered declines in aggravated assaults. (See Tables 3 and 4.)

The 1992 monthly figures show that the greatest number of aggravated assaults was recorded during July, while the lowest volumes occurred during February. (See Chart 2.15.)

Table 2.22—Aggravated Assault by Month, 1988-1992

[Percent distribution]

Months	1988	1989	1990	1991	1992
January	7.2	7.5	7.4	6.9	7.3
February	7.0	6.6	6.7	6.6	7.3
March	7.9	7.9	7.8	7.7	8.0
April	8.1	8.1	8.2	8.1	8.7
May	8.9	8.9	9.0	9.1	9.2
June	9.0	8.9	9.4	9.3	8.9
July	9.8	9.6	10.1	9.7	9.4
August	9.8	9.2	9.3	9.9	9.1
September	9.0	8.8	8.9	9.0	8.6
October	8.4	9.1	8.3	8.6	8.5
November	7.5	7.9	7.4	7.6	7.6
December	7.5	7.5	7.5	7.6	7.4

In 1992, aggravated assaults were up 3 percent nationwide as compared to 1991. For the same time period, cities collectively experienced a 2-percent increase in the aggravated assault volume, with cities from 25,000 to 49,999 in population recording the greatest rise, 7 percent. Cities with a million or more inhabitants experienced the only decline, 2 percent. The suburban counties registered a 4-percent increase and the rural counties, a 6-percent rise for the 2-year period. (See Table 12.)

Five- and 10-year trends for the country as a whole showed aggravated assaults up 24 percent above the 1988 level and 73 percent over the 1983 experience. (See Table 1.)

Rate

Up 2 percent above the 1991 rate, there were 442 reported victims of aggravated assault for every 100,000 people nationwide in 1992. The rate was 19 percent higher than in 1988 and 58 percent above the 1983 rate.

Higher than the national average, the rate in metropolitan areas was 492 per 100,000 in 1992. Cities outside metropolitan areas experienced a rate of 373, and rural counties, a rate of 174.

Regionally, the aggravated assault rates ranged from 513 per 100,000 people in the West to 347 per 100,000 in the Midwest. Compared to 1991, 1992 aggravated assault rates were up in two of the four regions; the South and West registered increases of 5 and 3 percent, respectively. The Northeast and Midwest showed declines, 1 and 2 percent, respectively. (See Table 4.)

Nature

In 1992, 31 percent of the aggravated assaults were committed with blunt objects or other dangerous weapons. Of the remaining weapon categories, personal weapons such as hands, fists, and feet were used in 26 percent of the offenses; firearms in 25 percent; and knives or cutting instruments in the remainder.

From 1991 to 1992, assaults with firearms rose by 5 percent, those involving personal weapons increased 4 percent, and those involving blunt objects or other dangerous weapons were up 2 percent. Aggravated assaults by knives or cutting instruments showed the only decline, 1 percent. State-by-state totals for weapons used in assaults during 1992 are shown in Table 22.

Table 2.23—Aggravated Assault, Type of Weapons Used, 1992

[Percent distribution by region]

AGGRAVATED ASSAULT

CHART 2.15

VARIATION FROM MONTHLY AVERAGE

1992

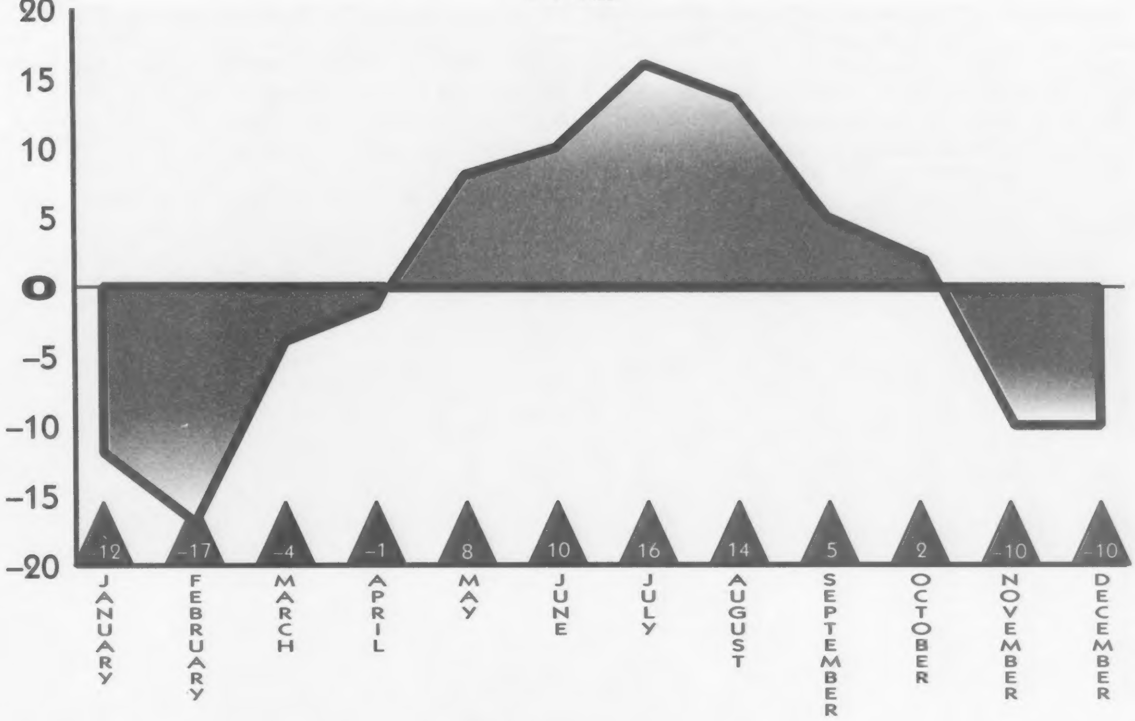

CHART 2.16

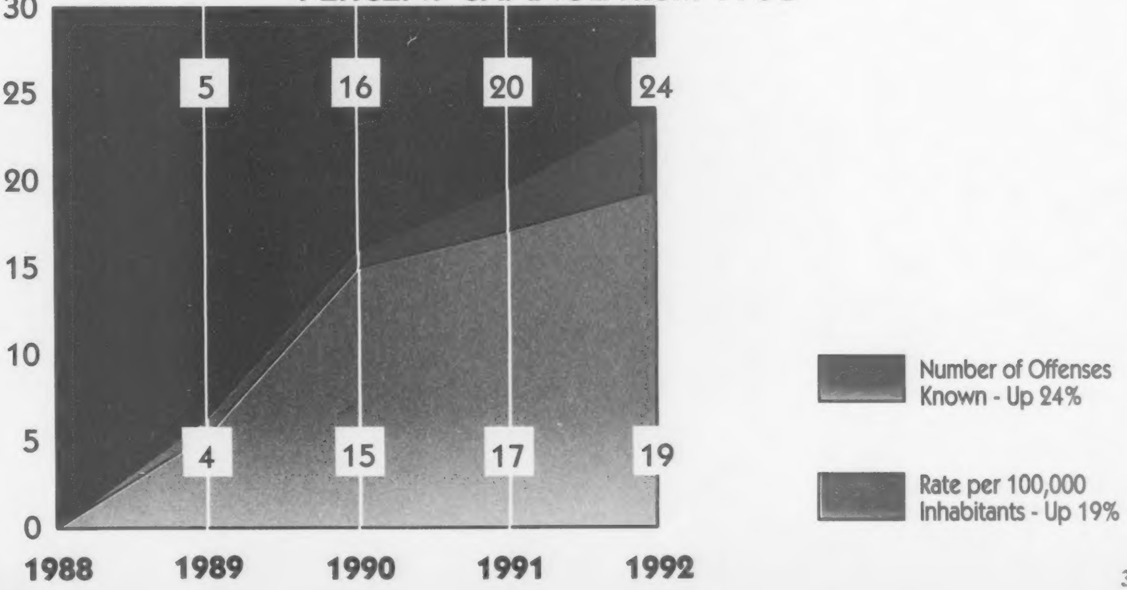
PERCENT CHANGE FROM 1988



Law Enforcement Response

During 1992, law enforcement agencies nationwide recorded a 56-percent aggravated assault clearance rate. The cities collectively reported 55 percent cleared, while the suburban and rural county law enforcement agencies cleared 60 and 63 percent, respectively. Among the city groupings, those with populations under 10,000 recorded the highest clearance rate, 63 percent. (See Table 25.)

Regional clearance percentages for aggravated assault were 59 percent in the West, 57 percent in the South, 56 percent in the Northeast, and 52 percent in the Midwest.

Twelve percent of the clearances reported nationally and in cities involved only persons under age 18. Persons in this age group were identified as the assailants in 14 percent of the clearances in the suburban counties and 9 percent of those in the rural counties.

The estimated 507,210 persons arrested for aggravated assault in 1992 represented two-thirds of all arrestees for violent crimes. Whites comprised 60 percent of the arrestees; blacks, 39 percent; and all other races, the remainder. Eighty-five percent of the arrestees were males and 15 percent, females. Fifteen percent of the total arrestees were under age 18.

Total arrests for aggravated assault were up 5 percent in 1992 from the 1991 total. During this 2-year period, arrests of persons under age 18 were up 8 percent, and arrests of adults increased 4 percent. A comparison of 1988 and 1992 figures showed increases of 26 percent for total arrests, 49 percent for juvenile arrests, and 23 percent for adult arrests.

PROPERTY CRIME TOTAL

DEFINITION

Property crime includes the offenses of burglary, larceny-theft, motor vehicle theft, and arson. The object of these offenses is the taking of money or property, but there is no force or threat of force against the victims.

TREND

Year	*Number of offenses*[1]	*Rate per 100,000 inhabitants*[1]
1991	*12,961,116*	*5,139.7*
1992	*12,505,917*	*4,902.7*
Percent change	*−3.5*	*−4.6*

[1] Does not include arson. See page 57.

Estimated property crimes decreased to 12.5 million reported offenses in 1992, the lowest total since 1988. The 1992 total was 4 percent lower than that for 1991, but 1 percent above the 1988 total and 15 percent higher than in 1983.

Regionally, property crime was down 7 percent in the Northeast, 5 percent in the Midwest, and 4 percent in the South. The West showed virtually no change in its property crime volume from 1991. All city population groups showed property crime declines, with the greatest decrease (9 percent) in cities with populations of 1 million or more. Rural and suburban county law enforcement agencies recorded decreases of 2 and 4 percent, respectively. (See Tables 3, 4, and 12.)

As in previous years, 1992 monthly figures show more property crime occurred in August, while the lowest number was reported in February. (See Chart 2.17.)

Table 2.24—Property Crime Total by Month, 1988-1992

November	8.3	8.1	8.2	8.0	8.0
December	8.5	7.9	8.6	8.4	8.1

Rate

In 1992, there were an estimated 4,903 property crimes for every 100,000 United States inhabitants. The 1992 property crime rate was 5 percent lower than the 1991 rate and 2 percent under the 1988 rate, but 6 percent above the 1983 rate.

Geographically, the 1992 property crime rate declined in all regions as compared to 1991. The rate of 5,524 per 100,000 in the Western States was down 2 percent; 5,345 in the Southern States, down 5 percent; 4,368 in the Midwestern States, a 6-percent decline; and 4,105 in the Northeastern States, a 7-percent decline.

Property crime rates for 1992 were 5,401 in Metropolitan Statistical Areas, 4,830 in cities outside of MSAs, and 1,805 in rural counties. By population group, the highest rate—8,752—was recorded in cities with populations from 250,000 to 499,999. (See Table 16.)

Nature

Total dollar losses due to property crime were estimated at $15.2 billion in 1992, down from $16.1 billion in 1991. The average loss per offense in 1992 was $1,217, as compared to $1,243 in 1991.

In 1992, larceny-theft accounted for 63 percent of all property crime. Burglary accounted for 24 percent and motor vehicle theft for 13 percent. Although arson is excluded from the property crime offense and clearance tabulations because of its limited timespan as an Index offense and lower national coverage, it accounted for another 102,009 offenses and an average dollar loss of $16,649 per arson in 1992, based on data from 11,798 law enforcement agencies. The increase in the average loss per arson, up from $11,980 in 1991, was largely influenced by arson damages during the Los Angeles riots.

Regionally, 38 percent of property crime was accounted for by the Southern States, 24 percent by the Western States, 21 percent by the Midwestern States, and 17 percent by the Northeastern States.

Law Enforcement Response

Property crimes generally have lower clearance rates than violent crimes, and in 1992, the overall property crime clearance rate was 18 percent, as compared to 45 percent for violent crime. Geographically the 1992 property crime clearance rate equalled the Nation's 18 percent in three of the four regions. The Northeast recorded a lesser rate of 17 percent. (See Table 26.)

Twenty-three percent of the property crimes cleared by law enforcement nationwide and in cities in 1992 involved only young people under age 18. The juvenile percentage was 24 percent in suburban counties and 19 percent in rural counties. (See Table 28.)

The estimated 2.1 million persons arrested for property crimes in 1992 accounted for 15 percent of all arrestees. The volume of property crime arrests in 1992 was 3 percent below the 1991 level, but 3 percent higher than the 1988 total and 14 percent above the 1983 experience. Compared to 1991 totals, juvenile property crime arrests in 1992 showed no change, while adult arrests declined 4 percent. (See Tables 32, 34, and 36.)

In 1992, 74 percent of all property crime arrestees were males, 66 percent of the total were white, and 33 percent were under age 18.

PROPERTY CRIME

CHART 2.17

VARIATION FROM MONTHLY AVERAGE

1992

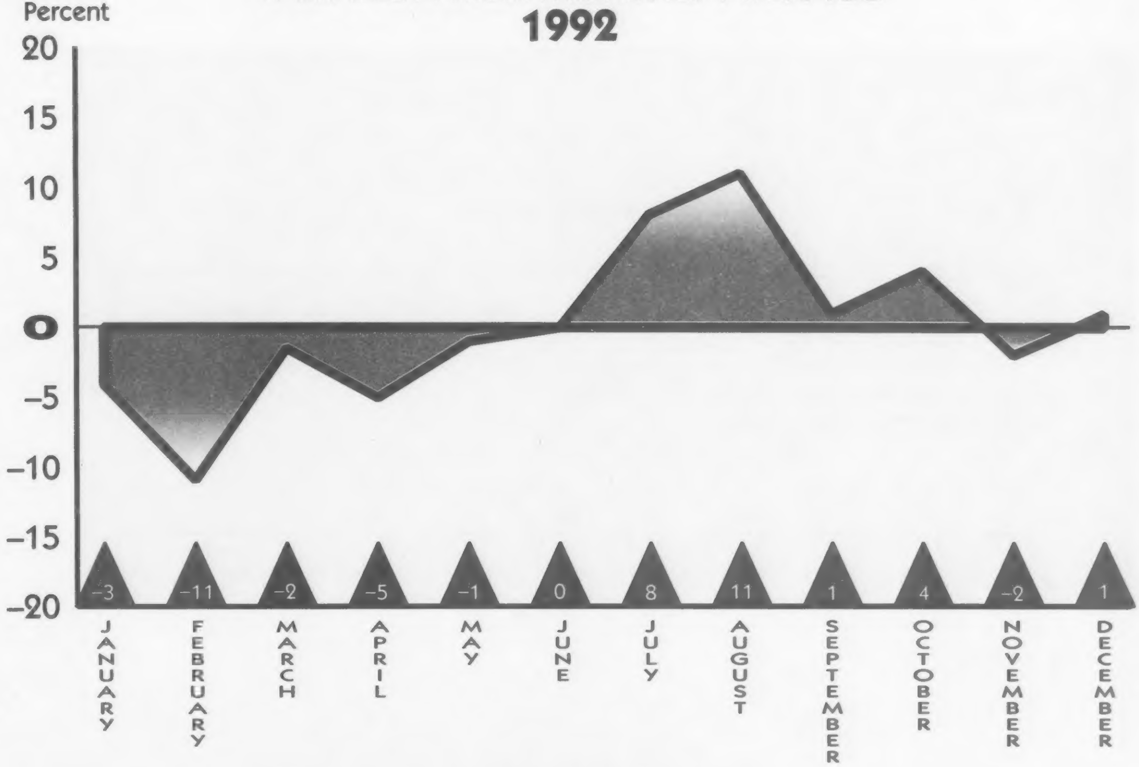

CHART 2.18

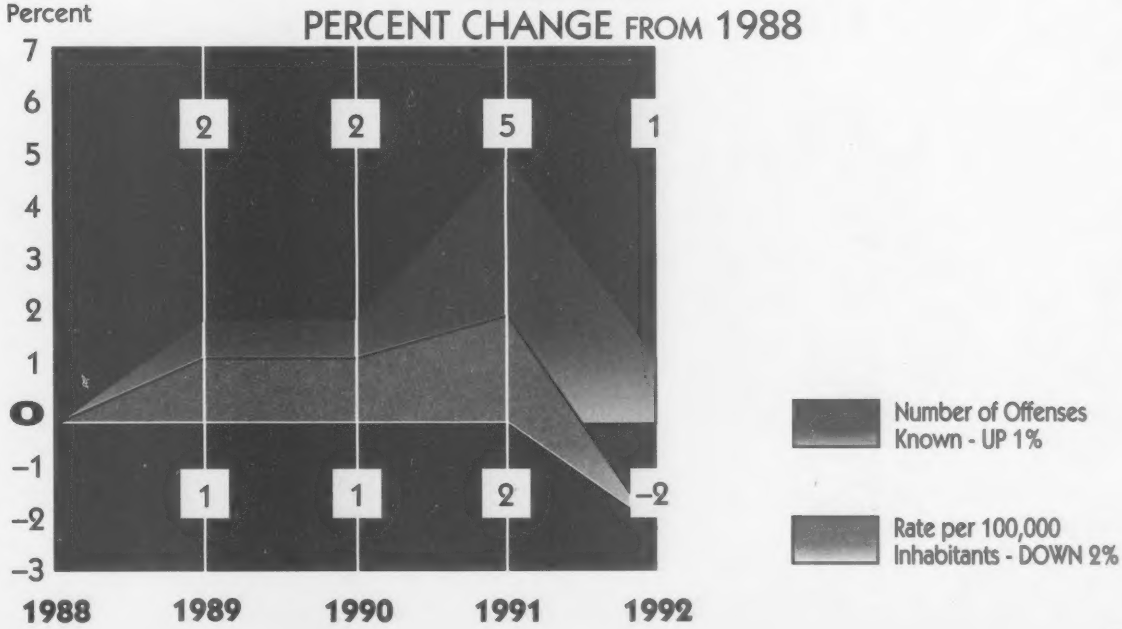
PERCENT CHANGE FROM 1988



BURGLARY

DEFINITION

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify an offense as burglary. Burglary in this Program is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

1992	*2,979,884*	*1,168.2*
Percent change	*−5.6*	*−6.7*

An estimated 2,979,884 burglaries occurred in the United States during 1992. These offenses accounted for 21 percent of the Crime Index total and 24 percent of the property crimes.

Distribution figures for the regions showed that the highest burglary volume occurred in the most populous Southern States, accounting for 41 percent of the total. The Western States followed with 24 percent, the Midwestern States with 20 percent, and the Northeastern States with 16 percent.

In 1992, the highest burglary totals were recorded during August, while the lowest count was reported in February. (See Chart 2.19.)

Table 2.25—Burglary by Month, 1988-1992

[Percent distribution]

Months	1988	1989	1990	1991	1992
January	8.4	8.8	8.8	8.1	8.6
February	7.8	7.3	7.5	7.3	7.7
March	8.1	8.2	8.1	8.1	8.2
April	7.5	7.7	7.8	7.9	7.8
May	8.1	8.4	8.1	8.3	8.2
June	8.0	8.3	7.9	8.2	8.1
July	8.8	9.2	8.9	9.2	9.0
August	9.3	9.3	9.0	9.2	9.0
September	8.6	8.6	8.3	8.6	8.4
October	8.5	8.5	8.5	8.6	8.3
November	8.4	8.1	8.3	8.0	8.2
December	8.5	7.8	8.7	8.6	8.3

Nationwide, the burglary volume dropped 6 percent in 1992 from the 1991 total. By population group, decreases were registered in all city groupings; the largest decrease was in cities with populations of 1 million or more, which showed a 9-percent decline. (See Table 12.)

Geographically, all four regions of the United States reported decreases in burglary volumes during 1992 as compared to 1991. Both the Northeastern States and the Southern States experienced 7-percent declines. The Midwestern States showed a 6-percent decrease; and the Western States reported the smallest change, a 2-percent decline.

Longer term national trends show burglary down 7 percent from the 1988 volume and 5 percent below the 1983 level.

Rate

A burglary rate of 1,168 per 100,000 inhabitants was registered nationwide in 1992. The rate was 7 percent lower than in 1991 and 13 percent below the 1983 rate. In 1992, for every 100,000 in population, the rate was 1,265 in the metropolitan areas, 1,012 in the cities outside metropolitan areas, and 661 in the rural counties.

Regionally, the burglary rate was 1,379 in the Southern States, 1,273 in the Western States, 964 in the Midwestern States, and 935 in the Northeastern States. A comparison of 1991 and 1992 rates showed decreases of 8 percent in the South, 7 percent in the Midwest and Northeast, and 4 percent in the West.

Nature

Two of every 3 burglaries in 1992 were residential in nature. Sixty-nine percent of all burglaries involved forcible entry, 23 percent were unlawful entries (without force), and the remainder were forcible entry attempts. Offenses for which time of occurrence was reported were evenly divided between day and night.

Burglary victims suffered losses estimated at $3.8 billion in 1992, and the average dollar loss per burglary was $1,278. The average loss for residential offenses was $1,215, while for nonresidential property, it was $1,400. Compared to 1991, the 1992 average loss for residential property declined, while for nonresidential property the average was up. Both residential and nonresidential burglary volumes showed declines from 1991 to 1992, 5 and 6 percent, respectively. (See Table 23.)

See Section V for a discussion of residential burglary probability.

Law Enforcement Response

Geographically in 1992, a 13-percent clearance rate was recorded for burglaries brought to the attention of law enforcement agencies across the country. In the South, the clearance rate was 15 percent; in the Northeast and West, 13 percent; and in the Midwest, 12 percent.

Rural county law enforcement cleared 16 percent of the burglaries in their jurisdictions. Agencies in suburban counties cleared 14 percent, and those in cities, 13 percent.

BURGLARY

CHART 2.19

VARIATION FROM MONTHLY AVERAGE

1992

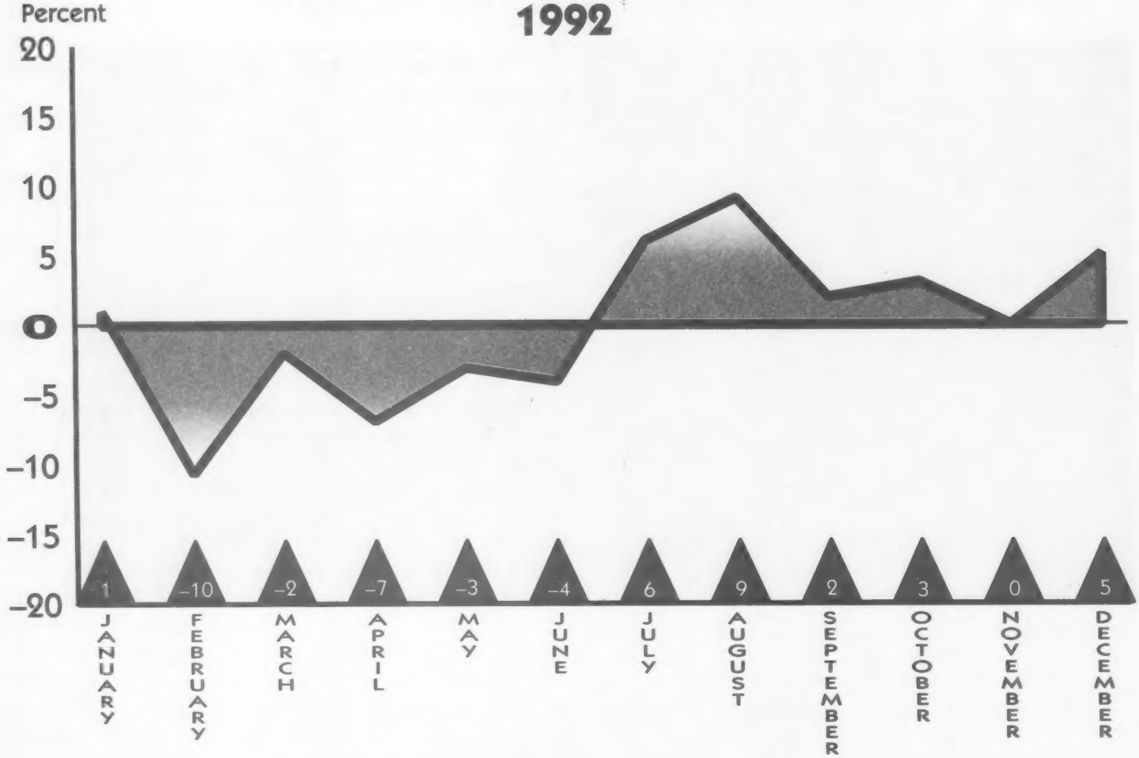

CHART 2.20

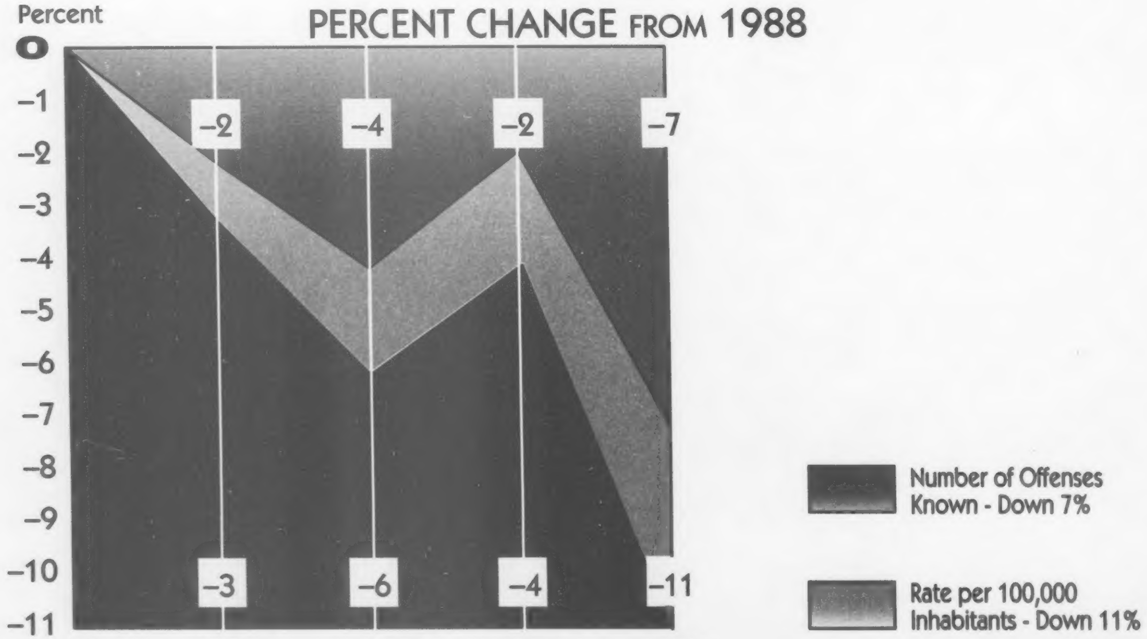
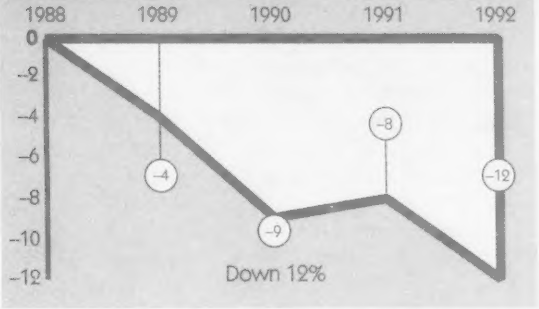
PERCENT CHANGE FROM 1988

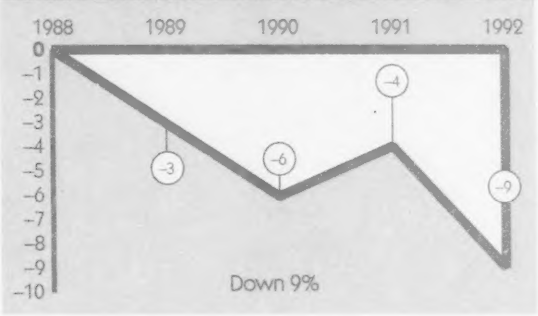


BURGLARY Percent Change from 1988 CHART 2.21

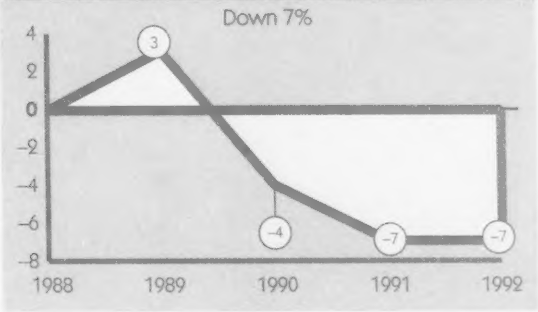
Residence Daytime



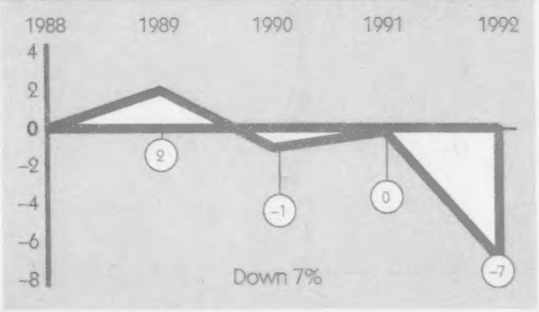
Residence Nighttime



Non-Residence Daytime



Non-Residence Nighttime



Adults were involved in 80 percent of all burglary offenses cleared; the remaining 20 percent involved only young people under 18 years of age. Persons under age 18 accounted for 19 percent of the burglary clearances in cities, 21 percent of those in rural counties, and 22 percent of those in suburban counties. The highest degree of juvenile involvement was recorded in the Nation's smallest cities (under 10,000 in population) where young persons under 18 years of age accounted for 26 percent of the clearances. (See Table 28.)

In the UCR Program, several persons may be arrested in connection with the clearance of one crime, or the arrest of one individual may clear numerous offenses. The latter is often true in cases of burglary, for which an estimated 424,000 arrests were made in 1992. Arrest trends between 1991 and 1992 show total burglary arrests were down 2 percent. Arrests of persons under 18 years of age decreased 1 percent, while those of adults were down 3 percent. For the same 2-year time period, total burglary arrest trends showed a decrease of 3 percent in cities, and 1-percent in the rural counties. The suburban counties showed no change.

Ninety-one percent of the burglary arrestees during 1992 were males, and 64 percent of the total were under 25 years of age. Among all burglary arrestees, whites accounted for 68 percent, blacks for 30 percent, and other races for the remainder.

LARCENY-THEFT

DEFINITION

Larceny-theft is the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., in which no use of force, violence, or fraud occurs. In the Uniform Crime Reporting Program, this crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft is also excluded from this category inasmuch as it is a separate Crime Index offense.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1991	*8,142,228*	*3,228.8*
1992	*7,915,199*	*3,103.0*
Percent change	*−2.8*	*−3.9*

Larceny-theft, estimated at 7.9 million offenses during 1992, comprised 55 percent of the Crime Index total and 63 percent of the property crimes. Similar to the experience in previous years, larceny-thefts were recorded most often during the month of August and least frequently in February. (See Chart 2.22.)

When viewed geographically, the Southern States, the most populous region, recorded 38 percent of the larceny-theft total. The Western States recorded 24 percent; the Midwestern States, 22 percent; and the Northeastern States, 16 percent. (See Table 3.)

Table 2.26—Larceny-Theft by Month, 1988-1992

[Percent distribution]

Months	1988	1989	1990	1991	1992
January	7.6	8.0	8.2	7.8	8.2
February	7.5	7.2	7.4	7.5	7.8
March	8.2	8.2	8.2	8.2	8.3
April	7.8	8.0	7.9	8.1	8.1
May	8.3	8.6	8.3	8.4	8.2
June	8.5	8.7	8.3	8.5	8.5
July	9.0	9.2	8.9	9.2	9.1
August	9.5	9.5	9.1	9.3	9.1
September	8.5	8.3	8.2	8.3	8.4
October	8.7	8.6	8.7	8.7	8.6
November	8.2	8.0	8.1	7.9	7.9
December	8.3	7.7	8.4	8.2	8.0

Compared to 1991, the 1992 volume of larceny-thefts showed a decline of 3 percent in the Nation, in all cities collectively, and in suburban counties. The rural counties showed a decline of less than 1 percent.

Regionally, larceny declines were recorded in the Northeast, 6 percent; in the Midwest, 4 percent; and in the South, 2 percent. The number of larceny-thefts in the West showed no change.

The 5- and 10-year national trends indicated larceny was up 3 percent over the 1988 total and 18 percent above the 1983 level.

Rate

The 1992 larceny-theft rate was 3,103 per 100,000 United States inhabitants. The rate was 4 percent lower than in 1991 and 1 percent under the 1988 level. When compared to 1983, the rate showed an increase of 8 percent. The 1992 rate was 3,378 per 100,000 inhabitants of metropolitan areas; 3,601 per 100,000 population in cities outside metropolitan areas; and 1,036 per 100,000 people in the rural counties. (See Table 2.)

For all regions, the larceny-theft rate per 100,000 inhabitants declined from 1991 levels. The rate in the Northeast was 2,443, a decline of 6 percent; the Midwest's 1992 rate of 2,928 was down 5 percent; and rates of 3,388 in the South and 3,452 in the West were down 4 and 2 percent, respectively.

Nature

During 1992, the average value of property stolen due to larceny-theft was $483, a slight increase from $478 in 1991. When the average value was applied to the estimated number of larceny-thefts, the loss to victims nationally was $3.8 billion for the year. This estimated dollar loss is considered conservative since many offenses in the larceny category, particularly if the value of the stolen goods is small, never come to law enforcement attention. Losses in 24 percent of the thefts reported to law enforcement in 1992 ranged from $50 to $200, while in 36 percent, they were over $200.

Losses of goods and property reported stolen as a result of pocket-picking averaged $430; purse-snatching, $292; and shoplifting, $106. Thefts from buildings resulted in an average loss of $802; from motor vehicles, $555; and from coin-operated machines, $141. The average value loss due to thefts of motor vehicle accessories was $297 and for thefts of bicycles, $231. (See Table 23.)

Thefts of motor vehicle parts, accessories, and contents made up the largest portion of reported larcenies—37 percent. Also contributing to the high volume of thefts were shoplifting, accounting for 16 percent; thefts from buildings, 14 percent; and bicycle thefts, 6 percent. The remainder were distributed among pocket-picking, purse-snatching, thefts from coin-operated machines, and all other types of larceny-thefts. Table 2.27 presents the distribution of larceny-theft by type and geographic region.

Table 2.27—Larceny Analysis by Region, 1992

[Percent distribution]

	United States Total	North-eastern States	Mid-western States	Southern States	Western States
Total[1]	100.0	100.0	100.0	100.0	100.0

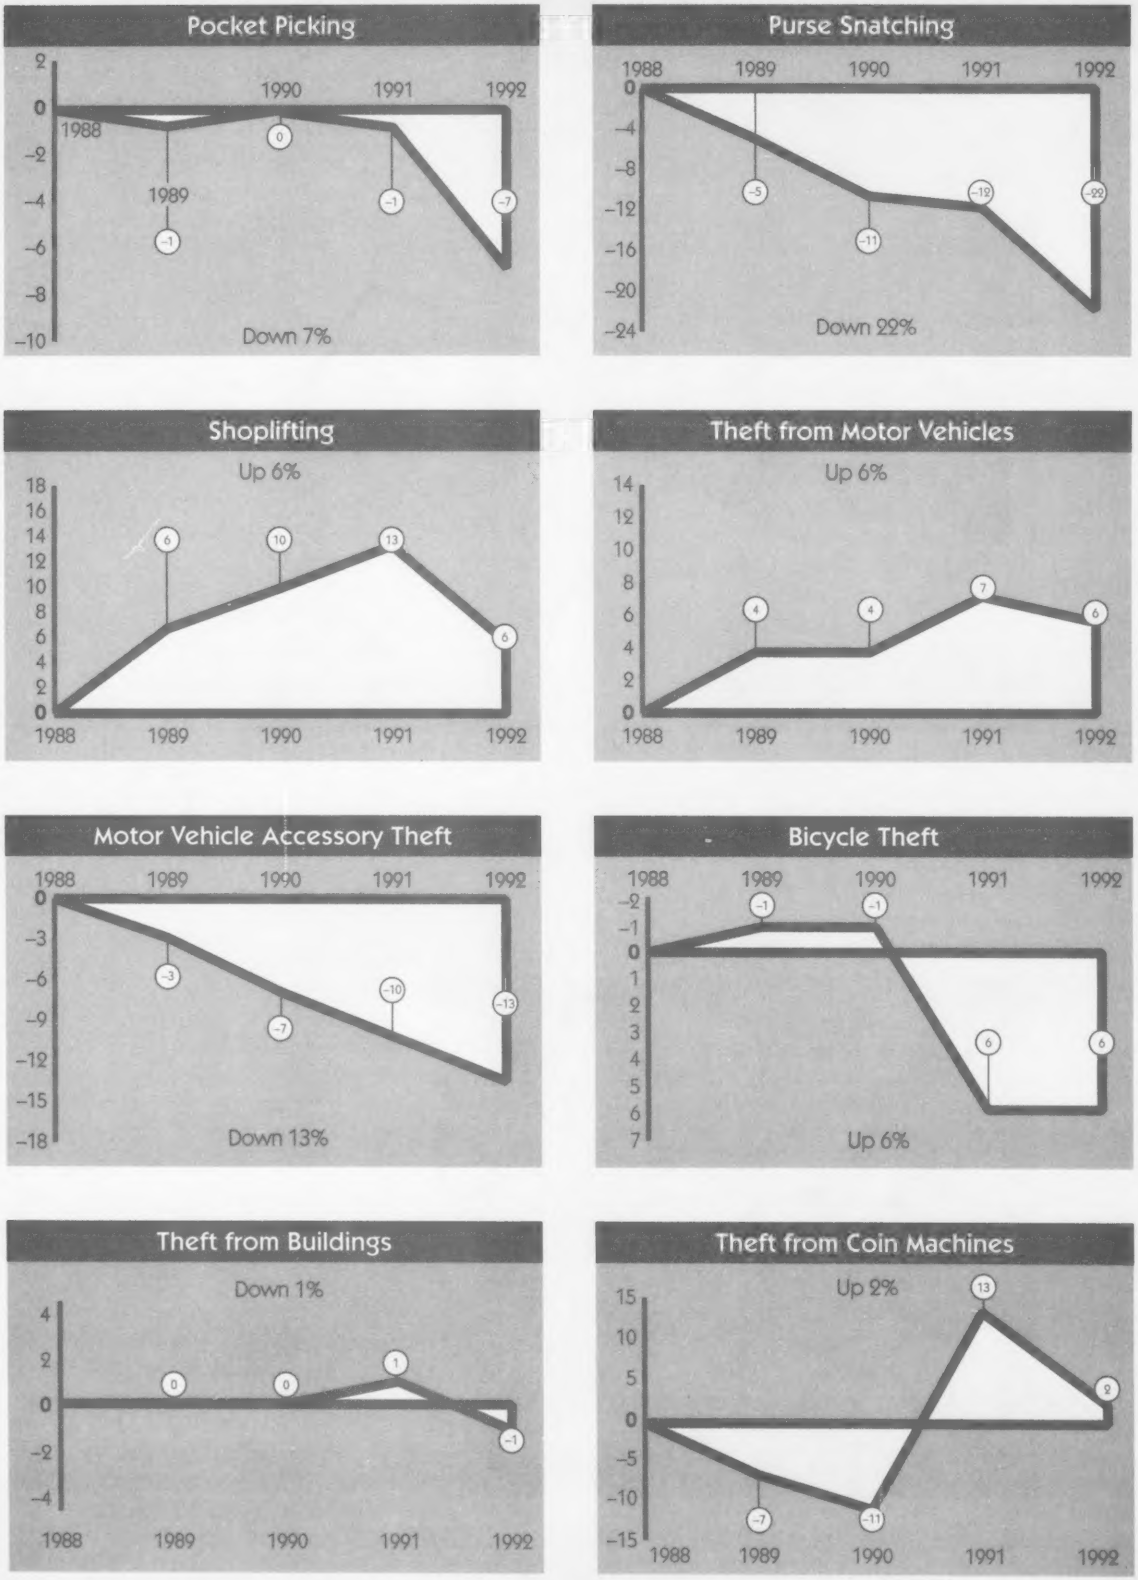

CHART 2.25

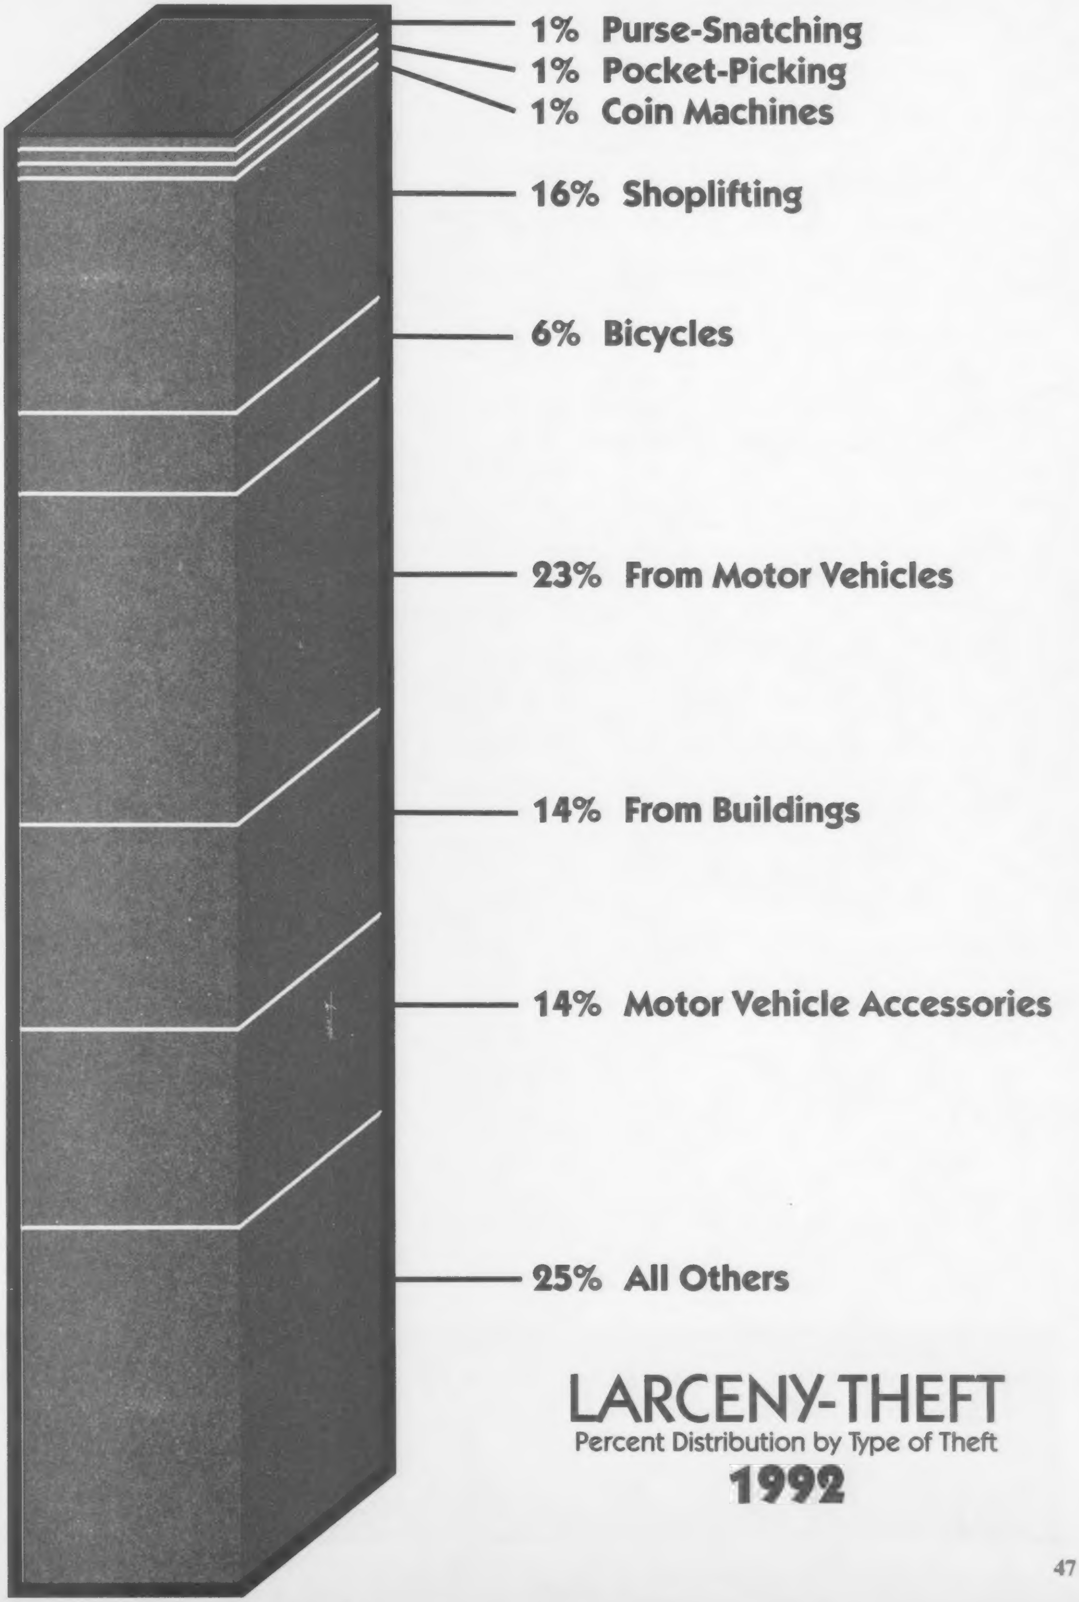

LARCENY-THEFT
Percent Distribution by Type of Theft
1992

Law Enforcement Response

Twenty percent of the reported larceny-thefts were cleared nationwide during 1992. Cities collectively recorded a 21-percent clearance rate, with the highest rate, 26 percent, reported by law enforcement agencies in cities from 10,000 to 24,999 in population. Suburban and rural counties recorded 17-percent and 18-percent clearance rates, respectively.

Geographically, law enforcement agencies in the Western States cleared 21 percent of the larceny offenses brought to their attention, while similar to the national total, the Northeastern and Midwestern Regions each recorded clearance rates of 20 percent. The Southern Region registered 19 percent of its larceny offenses cleared. (See Table 26.)

Twenty-three percent of the larceny-theft clearances nationally and in cities involved only offenders under 18 years of age. Twenty-five percent of those in suburban counties and 18 percent of those in rural counties were accounted for by persons in this age group.

Between 1991 and 1992, the total number of persons arrested for larceny-theft dropped 3 percent. By gender, arrests for males and females declined 3 and 2 percent, respectively. For the 2-year period, adult arrests were down 4 percent, and those of persons under 18 years of age remained virtually the same.

Considering a longer timeframe, larceny-theft arrests rose 4 percent for the 5-year period, 1988-1992. Arrests of adults were up 2 percent, and of juveniles, up 8 percent. During this 5-year timespan, male and female arrests rose 2 and 9 percent, respectively.

Larceny-theft not only comprised the largest portion of Crime Index offenses reported to law enforcement, but this offense also accounted for 52 percent of the arrests for Index crimes and 70 percent of those for property crimes in 1992. Forty-four percent of the larceny arrests were of persons under 21 years of age, and 31 percent of the arrestees were under 18. Females, who were arrested for this offense more often than for any other in 1992, comprised 32 percent of all larceny-theft arrestees.

Whites accounted for 66 percent of the total larceny-theft arrestees, blacks for 31 percent, and all other races for the remainder.

MOTOR VEHICLE THEFT

DEFINITION

Defined as the theft or attempted theft of a motor vehicle, this offense category includes the stealing of automobiles, trucks, buses, motorcycles, motorscooters, snowmobiles, etc. The definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1991	*1,661,738*	*659.0*
1992	*1,610,834*	*631.5*
Percent change	*−3.1*	*−4.2*

An estimated total of 1,610,834 thefts of motor vehicles occurred in the United States during 1992. These offenses comprised 13 percent of all property crimes. The regional distribution of motor vehicle thefts showed 32 percent of the volume was in the Southern States, 27 percent in the Western States, 23 percent in the Northeastern States, and 18 percent in the Midwestern States.

The 1992 monthly figures showed that the greatest number of motor vehicle thefts was recorded during the month of August, while the lowest count was in February. (See Chart 2.26.)

Table 2.28—Motor Vehicle Theft by Month, 1988-1992

[Percent distribution]

Months	1988	1989	1990	1991	1992
January	8.0	8.3	8.5	8.3	8.8
February	7.6	7.3	7.6	7.5	7.9
March	7.9	8.1	8.4	8.2	8.2
April	7.4	7.5	7.9	7.8	7.8
May	7.8	8.0	8.1	8.1	8.1
June	8.0	8.2	8.1	8.2	8.2
July	8.8	8.8	8.8	8.7	8.8
August	9.4	9.0	8.8	8.9	8.9
September	8.7	8.5	8.4	8.3	8.2
October	9.0	9.0	8.8	8.7	8.6
November	8.7	8.7	8.3	8.5	8.3
December	8.7	8.5	8.4	8.8	8.2

The number of motor vehicle thefts fell 3 percent nationally and in the cities overall from 1991 to 1992. During the same period, the suburban counties experienced a 2-percent drop and the rural counties, a 6-percent decline.

Geographically, three regions experienced motor vehicle theft decreases, while the Western Region showed a 3-percent increase. (See Table 4.)

The accompanying chart shows that the volume of motor vehicle thefts in 1992 increased 12 percent over the 1988 volume.

Rate

The 1992 national motor vehicle theft rate—631 per 100,000 people—decreased 4 percent from the rate in 1991. The rate was 8 percent higher than in 1988 and 47 percent above the 1983 rate.

For every 100,000 inhabitants living in MSAs, there were 758 motor vehicle thefts reported in 1992. The rate in cities outside metropolitan areas was 217 and in rural counties, 109. As in previous years, the highest rates were in the Nation's most heavily populated municipalities, indicating that this offense is primarily a large-city problem. For every 100,000 inhabitants in cities with populations over 250,000, the 1992 motor vehicle theft rate was 1,591. The Nation's smallest cities, those with fewer than 10,000 inhabitants, recorded a rate of 246 per 100,000 and the rural counties, a rate of 117 per 100,000.

Among the regions, the motor vehicle theft rates ranged from 799 per 100,000 people in the Western States to 477 in the Midwestern States. The Northeastern States' rate was 727 and the Southern States' rate, 578. All regions except the Western States registered rate decreases from 1991 to 1992. (See Table 4.)

An estimated average of 1 of every 120 registered motor vehicles was stolen nationwide during 1992. Regionally, this rate was greatest in the Northeast where 1 of every 89 motor vehicles registered was stolen. The other three regions reported lesser rates—1 per 98 in the West, 1 per 135 in the South, and 1 per 168 in the Midwest.

Nature

During 1992, the estimated value of motor vehicles stolen nationwide was nearly $7.6 billion. At the time of theft, the average value per vehicle stolen was $4,713. The recovery percentage for the value of vehicles stolen was higher than for any other property type. Relating the value of vehicles stolen to the value of those recovered resulted in a 64-percent recovery rate for 1992.

Eighty percent of all motor vehicles reported stolen during the year were automobiles, 15 percent were trucks or buses, and the remainder were other types.

See Section V for a discussion of automobile theft probability.

Table 2.29—Motor Vehicle Theft, 1992

[Percent distribution by region]

Region	Total[1]	Autos	Trucks and buses	Other vehicles
Total	100.0	79.6	15.1	5.4
Northeastern States	100.0	92.4	4.8	2.9
Midwestern States	100.0	83.7	11.1	5.2
Southern States	100.0	74.2	18.7	7.1
Western States	100.0	72.8	21.6	5.6

[1] Because of rounding, percentages may not add to totals.

MOTOR VEHICLE THEFT

CHART 2.26

VARIATION FROM MONTHLY AVERAGE

1992

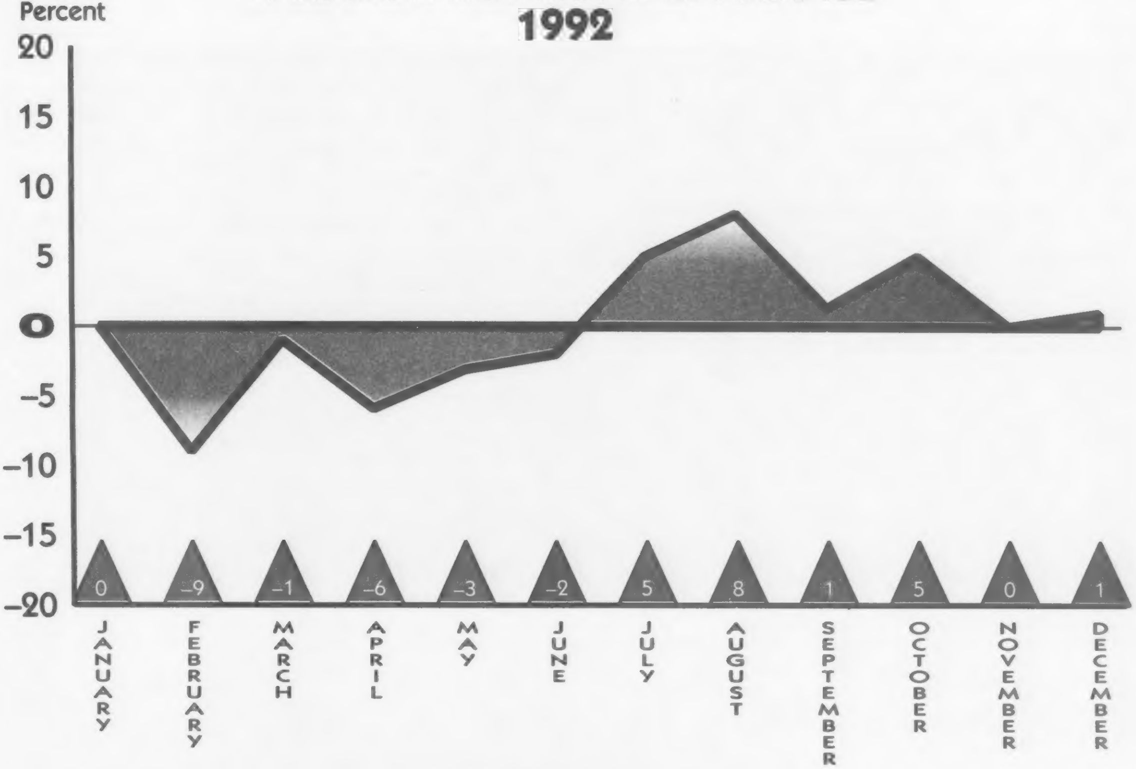

CHART 2.27

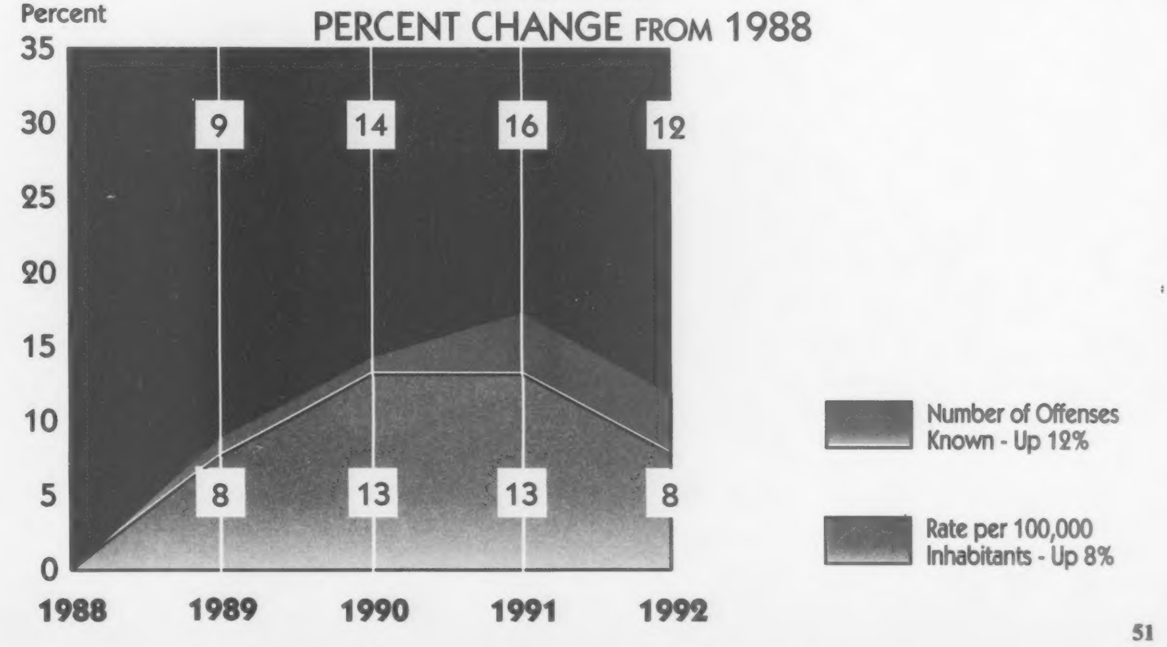
PERCENT CHANGE FROM 1988



Law Enforcement Response

Law enforcement agencies nationwide recorded a 14-percent motor vehicle theft clearance rate for 1992. Those in cities cleared 13 percent; those in suburban counties cleared 16 percent; and rural county agencies cleared 32 percent.

Regional clearance percentages for motor vehicle theft were 17 percent in the Southern States, 15 percent in the Midwestern States, 12 percent in the Western States, and 10 percent in the Northeastern States.

Persons in the under-18 age group accounted for 24 percent of the motor vehicle thefts cleared both nationally and in cities. They comprised 23 percent of the clearances in the suburban counties and 21 percent of those in the rural counties.

During 1992, law enforcement agencies nationwide made an estimated 197,600 arrests for motor vehicle theft. Males accounted for 89 percent of the persons arrested for motor vehicle theft. Fifty-eight percent of the arrestees were white, 39 percent were black, and the remainder were of other races.

A large proportion of motor vehicle theft arrestees were accounted for by the younger segment of the population. In 1992, 62 percent of all persons arrested for this offense were under 21 years of age, and those under 18 comprised 44 percent of the total. Between 1991 and 1992, overall arrests of males under age 18 decreased 5 percent, while those of females were up 7 percent.

Total motor vehicle theft arrests, as well as those of adults and persons under age 18, were down 4 percent in 1992 from the previous year. For longer timeframes, total vehicle theft arrests in 1992 were 1 percent higher than in 1988 and 71 percent above the 1983 level.

ARSON

DEFINITION

Arson is defined by the Uniform Crime Reporting Program as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded.

A total of 102,009 arson offenses was reported by 12,449 law enforcement agencies across the country; these agencies furnished from 1 to 12 months of reports during 1992. Of these reporting agencies, 11,798 provided the detailed information—type of structure, estimated monetary value of the property damaged, etc.—from which the tables on the accompanying pages were tabulated. Further information regarding arson offenses and trends is presented in Tables 12 through 15 and arson clearances in Tables 25 through 28. Since only 9,054 agencies covering 75 percent of the United States population submitted reports for all 12 months of the year, the data user should be aware that, while conservative indicators, the figures do not represent the Nation's total arson experience.

The number of arson offenses reported nationally and in the Nation's cities showed virtually no change in 1992 as compared to the 1991 total. Changes in counts for city population groups ranged from a 5-percent increase in cities with populations over 1 million to 5-percent decreases in cities with 100,000 - 249,999 inhabitants and in those between 10,000 - 24,999. The suburban counties registered a 1-percent increase, and the rural counties, a 4-percent decline. (See Table 12.)

Geographically, arson decreased 6 percent in the Northeast, 5 percent in the South, and 2 percent in the Midwest. A 10-percent increase was recorded in the West.

By property type nationally, the number of arsons of structures rose 1 percent. Those of mobile property decreased 4 percent and of all other property rose 5 percent. (See Table 15.)

Caution is recommended when viewing arson trend information. The percent change figures may have been influenced by improved arson reporting procedures during the collection's relatively limited timespan. It is expected that year-to-year statistical comparability will improve as collection continues.

Table 2.30—Arson Rate, Population Group, 1992

[9,054 agencies; 1992 estimated population 190,161,000; rate per 100,000 inhabitants]

Group	Rate
Total	48.2
Total cities	56.0
Group I (cities 250,000 and over)	91.1
(cities 1,000,000 and over)	102.5
(cities 500,000 to 999,999)	71.5
(cities 250,000 to 499,999)	91.7
Group II (cities 100,000 to 249,999)	64.1
Group III (cities 50,000 to 99,999)	43.3
Group IV (cities 25,000 to 49,999)	36.5
Group V (cities 10,000 to 24,999)	26.0
Group VI (cities under 10,000)	29.3
Suburban counties	35.8
Rural counties	20.1
Suburban area	32.9

Rate

Since population coverage for arson data is lower than for the other Crime Index offenses, arson rates per 100,000 inhabitants are tabulated independently. Based only on figures from law enforcement agencies supplying 12 months of statistics for all Index crimes, including arson, the 1992 rates are shown in Table 2.30.

The rates ranged from 103 per 100,000 inhabitants in cities with populations over 1 million to 20 per 100,000 rural county inhabitants. The suburban counties and all cities collectively recorded rates of 36 and 56 per 100,000 inhabitants, respectively. Overall, the 1992 national arson rate was 48 per 100,000 population.

Regionally, the highest arson rate was registered in the Western States with 60 offenses per 100,000 population. Following were the Northeastern States with a rate of 47 per 100,000, the Midwestern States with 45 per 100,000, and the Southern States with 41 per 100,000.

Nature

As in previous years, structures were the most frequent targets of arsonists in 1992 and comprised 54 percent of the reported incidents. Twenty-seven percent of the arsons were directed at mobile property (motor vehicles, trailers, etc.), while other types of property (crops, timber, etc.) accounted for 20 percent.

Table 2.31—Arson, Type of Property, 1992

[11,798 agencies; 1992 estimated population 199,960,000]

Property classification	Number of offenses	Percent distribution[1]
Total	**86,547**	**100.0**
Total structure	46,615	53.9
Single occupancy residential	19,682	22.7
Other residential	7,894	9.1
Storage	4,016	4.6
Industrial/manufacturing	747	.9
Other commercial	6,566	7.6
Community/public	4,685	5.4
Other structure	3,025	3.5
Total mobile	22,976	26.5
Motor vehicles	21,422	24.8
Other mobile	1,554	1.8
Other	16,956	19.6

[1] Because of rounding, percentages may not add to totals.

Residential property was involved in 59 percent of the structural arsons during the year, with 42 percent of such offenses directed at single-occupancy dwellings. Nineteen percent of all targeted structural property was either uninhabited or abandoned at the time the arson occurred.

Motor vehicles comprised 93 percent of all mobile property at which arsons were directed.

Table 2.32—Arson, Structures Not in Use, 1992

[11,798 agencies; 1992 estimated population 199,960,000]

Type of structure	Number of offenses	Percent not in use
Total	**46,615**	**19.5**
Single occupancy residential	19,682	23.4
Other residential	7,894	14.5
Storage	4,016	26.2
Industrial/manufacturing	747	19.9
Other commercial	6,566	12.8
Community/public	4,685	9.7
Other structure	3,025	27.4

The monetary value of property damaged due to reported arsons averaged $16,649 per incident in 1992. The overall average for all types of structures was $28,343. Mobile properties averaged $3,909 per incident, and other targets averaged $1,763.

The average value of property loss for arson increased substantially in 1992 as compared to 1991 average dollar losses. Large losses resulting from arsons during the Los Angeles riots greatly influenced the overall average, as well as those for all structures and commercial-type structures.

Table 2.33—Arson, Monetary Value of Property Damaged, 1992

[11,798 agencies; 1992 estimated population 199,960,000]

Property classification	Number of offenses	Average damage
Total	**86,547**	**$16,649**
Total structure	46,615	28,343
Single occupancy residential	19,682	14,937
Other residential	7,894	13,563
Storage	4,016	17,754
Industrial/manufacturing	747	86,233
Other commercial	6,566	103,884
Community/public	4,685	17,630
Other structure	3,025	6,497
Total mobile	22,976	3,909
Motor vehicles	21,422	3,700
Other mobile	1,554	6,782
Other	16,956	1,763

Law Enforcement Response

The national 1992 arson clearance rate was 15 percent. Agencies in cities with fewer than 10,000 inhabitants showed the highest rate, clearing 24 percent of the arson offenses brought to their attention. Rural county law enforcement agencies cleared 22 percent; those in suburban counties, 17 percent; and in cities, 14 percent. (See Table 25.)

Regionally, the Southern States recorded a clearance rate of 21 percent; both the Western and Northeastern States, 13 percent; and the Midwestern States, 11 percent.

Forty-two percent of all 1992 arson clearances involved only young people under age 18, a higher percentage of juvenile involvement than for any other Index crime. Persons in this age group accounted for 40 percent of structural arson clearances, 24 percent of the clearances for arsons of mobile property, and 59 percent of those of all other property.

Table 2.34—Arson Offenses Cleared by Arrest,[1] 1992

[11,798 agencies[2]; 1992 estimated population 199,960,000]

Property classification	Number of offenses	Percent cleared by arrest
Total	**86,547**	**17.3**
Total structure	46,615	21.2
Single occupancy residential	19,682	22.3
Other residential	7,894	23.1
Storage	4,016	16.2
Industrial/manufacturing	747	12.4
Other commercial	6,566	13.1
Community/public	4,685	33.3
Other structure	3,025	16.7
Total mobile	22,976	8.2
Motor vehicles	21,422	7.8
Other mobile	1,554	14.7
Other	16,956	19.0

[1] Includes offenses cleared by exceptional means.

[2] To be included in this table, it was necessary that arson clearances be reported by property classification.

By population grouping, juveniles were the offenders in 43 percent of the city and suburban county arson clearances and 27 percent of those in the rural counties.

The accompanying tables show clearance data only for those 11,798 law enforcement agencies which were able to furnish breakdowns by type for the structural and mobile classifications. As can be seen, the highest clearance rate (33 percent) was recorded for offenses in which community or public structures were involved, while the lowest rate (8 percent) was registered for motor vehicles.

Table 2.35—Arson Offenses Cleared by Arrest[1] of Persons under 18 Years of Age, 1992

[11,798 agencies[2]; 1992 estimated population 199,960,000]

Property classification	Total clearances	Percent under 18
Total	**15,000**	**42.1**
Total structure	9,888	40.2
Single occupancy residential	4,396	33.2
Other residential	1,821	33.2
Storage	651	55.1
Industrial/manufacturing	93	35.5
Other commercial	859	29.2
Community/public	1,562	65.4
Other structure	506	49.6
Total mobile	1,892	23.8
Motor vehicles	1,664	22.0
Other mobile	228	37.8
Other	3,220	58.6

[1] Includes offenses cleared by exceptional means.

[2] To be included in this table, it was necessary that arson clearances be reported by property classification.

The estimated number of arrests for arson during 1992 totaled 19,900. Forty-nine percent of the arrestees were under 18 years of age and 67 percent were under 25. Males comprised 87 percent of all arson arrestees. Seventy-six percent of those arrested were white, 22 percent were black, and the remainder were of other races.

Trends for 1991 versus 1992 show arson arrests increased 2 percent nationwide, 3 percent in the Nation's cities, and 4 percent in rural counties. The suburban counties experienced a 4-percent decrease in total arson arrests for the same 2-year period.

Nationwide, arrests of juveniles were up 8 percent, while adult arrests showed a 3-percent decrease from 1991 to 1992. During the same period, male arrests for arson were up 2 percent and female arrests, up 3 percent.

The 1992 arson arrest total for all ages was 7 percent higher than the 1988 level but 1 percent lower than in 1983.

Crime Index Tabulations

This Section's tabular portions present data on crime in the United States as a whole; geographic divisions; individual states; Metropolitan Statistical Areas; cities, towns, and counties; and college and university campuses. Also furnished in the following tables are national averages for the value of property stolen in connection with Crime Index offenses; further breakdowns by type for the robbery, burglary, larceny-theft, and arson classifications; information on the types of weapons used; and data on the type and value of property stolen and recovered.

Although the total number of crimes occurring throughout the Nation is unknown, information on those reported to law enforcement gives a reliable indication of criminal activity. In reviewing the tables in this report, it must be remembered, however, that many factors can cause the volume and type of crime to vary from place to place. Even though population, one of these factors, is used in computing crime rates, all communities are affected to some degree by seasonal or transient populations. Since counts of current, permanent population are used in their construction, crime rates do not account for short-term population variables, such as an influx of day workers, tourists, shoppers, etc. A further discussion of various factors contributing to the amount of crime in a given area is shown on page *v* of this publication.

National data can serve as a guide for the law enforcement administrator in analyzing the local crime count, as well as the performance of the jurisdiction's law enforcement agency. The analysis, however, should not end with a comparison based on data presented in this publication. It is only through an appraisal of local conditions that a clear picture of the community crime problem or the effectiveness of the law enforcement operation is possible.

National estimates of volume and rate per 100,000 inhabitants for all Crime Index offenses covering the past two decades are set forth in Table 1, "Index of Crime, United States, 1973-1992."

Table 2, "Index of Crime, United States, 1992," shows current year estimates for MSAs, rural counties, and cities and towns outside metropolitan areas. See Appendix III for the definitions of these community types.

Provided in Table 3, "Index of Crime, Regional Offense and Population Distribution, 1992," are data showing the geographical distribution of estimated Index crimes and population. When utilizing figures presented on a regional basis in this publication, the reader is cautioned to consider each region's proportion of the total United States population. For example, although the Southern States accounted for the largest volume of Crime Index offenses in 1992, they also represented the greatest regional population.

Note

The collection of statistics on arson as a Crime Index offense began in 1979. However, 1992 annual figures are not available for inclusion in tables presenting statistics for the total United States. Arson totals reported by individual law enforcement agencies are displayed in Tables 8 through 11. Two-year arson trends are shown in Tables 12 through 15.

[1] Populations are Bureau of the Census provisional estimates as of July 1, except 1980 and 1990 which are the decennial census counts.

[2] Because of rounding, the offenses may not add to totals.

[3] Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

[4] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

All rates were calculated on the offenses before rounding.

[1] Populations are Bureau of the Census provisional estimates as of July 1, 1992, and are subject to change.

[2] Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

[3] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4] The percentage representing area actually reporting will not coincide with the ratio between reported and estimated crime totals, since these data represent the sum of the calculations for individual states which have varying populations, portions reporting, and crime rates.

Table 3.—Index of Crime, Regional Offense and Population Distribution, 1992

Region	Population	Crime Index total	Modified Crime Index total[1]	Violent crime[2]	Property crime[2]	Murder and non-negligent man-slaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson[1]
United States Total[3]	**100.0**	**100.0**		**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	
Northeastern States	20.0	17.1		19.4	16.8	16.9	13.8	25.5	16.2	16.0	15.8	23.1	
Midwestern States	23.8	20.9		19.1	21.2	19.5	25.3	18.7	18.7	19.6	22.5	18.0	
Southern States	34.6	37.6		36.9	37.6	41.1	37.3	31.6	40.0	40.8	37.7	31.6	
Western States	21.6	24.4		24.6	24.3	22.5	23.6	24.2	25.1	23.5	24.0	27.3	

[1] Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

[2] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[3] Because of rounding, percentages may not add to totals.

[1] Populations are Bureau of the Census provisional estimates as of July 1 and are subject to change.

[2] Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

[3] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny–theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4] Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. The 1991 and 1992 forcible rape totals for Illinois were estimated using the national rate of forcible rapes when grouped by like agencies. See "Offense Estimation," page 376 for details.

[5] Data for 1991 were not available for the State of Iowa; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," page 376 for details.

[6] Includes offenses reported by the Zoological Police.

[7] The 1992 Bureau of Census population estimate for Puerto Rico was not available prior to publication; therefore, no population or rates per 100,000 inhabitants are provided. Offense totals are based on all reporting agencies and estimates for unreported areas.

[1] Although arson data were included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.
[2] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[3] Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
[4] Includes offenses reported by the Zoological Police.
[5] Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. The 1992 forcible rape totals for Illinois were estimated using the national rate of forcible rapes when grouped by like agencies. Therefore, only the state total is shown. See "Offense Estimation," page 376 for details.
[6] The 1992 Bureau of Census population estimate for Puerto Rico was not available prior to publication; therefore, no population or rates per 100,000 inhabitants are provided.

---

[1] Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Arson data for individual cities are shown in Table 8.

[2] Violent crimes are offenses of murder, forcible rape, robbery and aggravated assault.

[3] Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4] Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore the figures were excluded from the forcible rape, violent crime, and Crime Index total categories.

[5] The 1992 Bureau of the Census population estimates for the individual Puerto Rico MSA's were not available prior to publication; therefore no population or rates per 100,000 inhabitants are provided.

Table 7.—Offense Analysis, United States, 1988-1992

Classification	1988	1989	1990	1991	1992

[1] Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape, Crime Index total, and Modified Crime Index total categories.

Table 9.—Number of Offenses Known to the Police, Universities and Colleges, 1992

* Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data.

University/College	Student enrollment[1]	Violent[2] crime total	Violent Crime				Property[3] crime total	Property Crime			
			Murder and nonnegligent manslaughter	Forcible rape	Robbery	Aggravated assault		Burglary	Larceny-theft	Motor vehicle theft	Arson*

[1] The student enrollment figures provided by the United States Department of Education are for 1991, the most recent year available. The enrollment figure includes full-time and part-time students. See Appendix I for details.

[2] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3] Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4] Student enrollment figures were not available.

[5] Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape and violent crime total categories.

NOTE: Caution should be exercised in making any inter-campus comparisons or ranking schools, as university/college crime statistics are affected by a variety of factors. These include: demographic characteristics of the surrounding community, ratio of male to female students, number of on-campus residents, accessibility of outside visitors, size of enrollment, etc.

Table 10.—Number of Offenses Known to the Police, Suburban Counties, 1992

[The data shown in this table do not reflect county totals but are the number of offenses reported by the sheriff's office, county police department, or state police.]
* Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

County by State	Crime Index total	Modified* Crime Index total	Murder and non-negligent man-slaughter	Forcible rape	Robbery	Aggra-vated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*

[1] Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape, Crime Index total, and Modified Crime Index total categories.

Table 11.—Number of Offenses Known to the Police, Rural Counties 25,000 and over in Population, 1992

[The data shown in this table do not reflect county totals but are the number of offenses reported by the sheriff's office, county police department, or state police.]

* Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

County by State	Crime Index total	Modified* Crime Index total	Murder and non-negligent man-slaughter	Forcible rape	Robbery	Aggra-vated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*

[1] Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape, Crime Index total, and Modified Crime Index total categories.

Table 12.—Crime Trends, Offenses Known to the Police, Population Group, 1991–1992

[1992 estimated population]

Population group	Crime Index total	Modified Crime Index total[1]	Violent crime[2]	Property crime[3]	Murder and non-negligent man-slaughter	Forcible rape	Robbery	Aggra-vated assault	Burglary	Larceny–theft	Motor vehicle theft	Arson[1]

[1] The number of agency reports used in arson trends is less than used in compiling trends for other Crime Index offenses. It is not necessary to report arsons by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[2] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3] Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4] Includes state police agencies with no county breakdown.

[5] Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

[1] Suburban places are within Metropolitan Statistical Areas (MSAs) and include suburban city and county law enforcement agencies within the metropolitan area. Central cities are excluded. Nonsuburban places are outside MSAs.

[2] The number of agencies used in arson trends is less than used in compiling trends for other Crime Index offenses. It is not necessary to report arsons by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[3] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4] Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

[1] The number of agencies used in arson trends is less than used in compiling trends for other Crime Index offenses. It is not necessary to report arsons by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[2] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3] Property crimes are offenses of burglary, larceny–theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4] Crime offenses include sheriffs' and county law enforcement agencies. State police offenses are not included.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

Table 15.—Crime Trends, Offenses Known Breakdown, Population Group, 1991–1992

[1992 estimated population]

Population group	Forcible rape		Robbery				Aggravated assault				Burglary			Motor vehicle theft			Arson[1]		
	Rape by force	Assault to rape-attempts	Firearm	Knife or cutting instrument	Other weapon	Strong-armed	Firearm	Knife or cutting instrument	Other weapon	Hands, fists, feet, etc.	Forcible entry	Unlawful entry	Attempted forcible entry	Autos	Trucks and buses	Other vehicles	Structure	Mobile	Other

[1] The number of agency reports used in arson trends is less than used in compiling trends for the other Crime Index offenses.

[2] Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape categories.

Table 16.—Crime Rates, Offenses Known to the Police, Population Group, 1992

[1992 estimated population. Rate: Number of crimes per 100,000 inhabitants]

Population group	Crime Index total	Modified Crime Index total[1]	Violent crime[2]	Property crime[3]	Murder and nonnegligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson[1]
TOTAL ALL AGENCIES: 11,980 agencies; population 227,413,000:												
Number of offenses known	**13,435,411**		**1,833,501**	**11,601,910**	**22,543**	**101,065**	**653,323**	**1,056,570**	**2,760,159**	**7,306,295**	**1,535,456**

---

[1] Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for the other seven Crime Index offenses. Independently tabulated arson rates appear on page 54 of this publication.

[2] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3] Property crimes are offenses of burglary, larceny–theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4] Includes state police agencies with no county breakdown.

[5] Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Population figures were rounded to the nearest thousand. All rates were calculated on the population before rounding.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. See Appendix I for details.

Table 17.—Crime Rates, Offenses Known to the Police, Suburban and Nonsuburban Cities[1], Population Group, 1992

[1992 estimated population. Rate: Number of crimes per 100,000 inhabitants]

Table 19.—Crime Rates, Offenses Known Breakdown, Population Group, 1992—Continued

Population group	Forcible rape		Robbery				Aggravated assault				Burglary			Motor vehicle theft			Arson[1]		
	Rape by force	Assault to rape–attempts	Firearm	Knife or cutting instrument	Other weapon	Strong-armed	Firearm	Knife or cutting instrument	Other weapon	Hands, fists, feet, etc.	Forcible entry	Unlawful entry	Attempted forcible entry	Autos	Trucks and buses	Other vehicles	Structure	Mobile	Other
GROUP IV																			
639 cities, 25,000 to 49,999; population 22,289,000:																			
Number of offenses known	7,527	1,177	11,995	3,331	3,894	16,528	14,567	14,395	24,345	30,619	161,877	60,419	24,629	85,943	14,710	8,010			
Rate	33.8	5.3	53.8	14.9	17.5	74.2	65.4	64.6	109.2	137.4	726.3	271.1	110.5	385.6	66.0	35.9			
GROUP V																			
1,440 cities, 10,000 to 24,999; population 22,736,000:																			
Number of offenses known	6,395	958	7,057	2,070	2,622	10,154	10,996	11,818	18,299	26,701	135,021	54,423	19,424	59,415	11,318	6,251			
Rate	28.1	4.2	31.0	9.1	11.5	44.7	48.4	52.0	80.5	117.4	593.9	239.4	85.4	261.3	49.8	27.5			
GROUP VI																			
5,286 cities under 10,000; population 18,718,000:																			
Number of offenses known	4,311	825	4,239	1,619	1,169	6,274	7,257	8,429	12,410	27,691	98,120	48,303	14,447	34,302	7,517	5,167			
Rate	23.0	4.4	22.6	8.6	6.2	33.5	38.8	45.0	66.3	147.9	524.2	258.1	77.2	183.3	40.2	27.6			
SUBURBAN COUNTIES																			
1,171 agencies; population 46,582,000:																			
Number of offenses known	15,400	2,114	21,987	4,215	7,421	20,605	32,724	22,501	51,130	43,237	318,949	114,662	32,894	134,522	35,988	17,113			
Rate	33.1	4.5	47.2	9.0	15.9	44.2	70.2	48.3	109.8	92.8	684.7	246.1	70.6	288.8	77.3	36.7			
RURAL COUNTIES																			
2,163 agencies; population 22,255,000:																			
Number of offenses known	5,469	610	1,527	446	400	1,508	7,633	5,585	8,747	16,138	114,057	38,064	8,866	15,107	5,573	5,843			
Rate	24.6	2.7	6.9	2.0	1.8	6.8	34.3	25.1	39.3	72.5	512.5	171.0	39.8	67.9	25.0	26.3			
SUBURBAN AREA[2]																			
5,712 agencies; population 92,002,000:																			
Number of offenses known	27,102	3,992	40,378	9,257	13,470	44,404	53,981	43,843	87,558	97,895	583,199	226,327	73,810	280,167	61,553	31,468			
Rate	29.5	4.3	43.9	10.1	14.6	48.3	58.7	47.7	95.2	106.4	633.9	246.0	80.2	304.5	66.9	34.2			

[1] Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for the other seven Crime Index offenses. Independently tabulated arson rates appear on page 54 of this publication.

[2] Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Population figures were rounded to the nearest thousand. All rates were calculated on the population before rounding.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. See Appendix I for details.

Table 20.—Murder, State, Type of Weapon, 1992

State	Total murders[1]	Total firearms	Handguns	Rifles	Shotguns	Firearms (type unknown)	Knives or cutting instruments	Other weapons	Hands, fists, feet, etc.

SECTION III

Crime Index Offenses Cleared

For UCR purposes, law enforcement agencies clear or solve an offense when at least one person is arrested, charged with the commission of the offense, and turned over to the court for prosecution. Clearances recorded in 1992 may be for offenses which occurred in prior years. Several crimes may be cleared by the arrest of one person, while the arrest of many persons may clear only one offense. Law enforcement agencies may clear a crime by exceptional means when some element beyond law enforcement control precludes the placing of formal charges against the offender. Examples of circumstances allowing such clearances are the death of the offender (suicide, justifiably killed by police or private citizen, etc.); the victim's refusal to cooperate with prosecution after the offender has been identified; or the denial of extradition because the offender committed another crime and is being prosecuted in a different jurisdiction. In all exceptional clearance cases, law enforcement must have identified the offender, have enough evidence to support arrest, and know the offender's location.

Law enforcement agencies nationwide recorded a 21-percent Crime Index clearance rate for 1992. Collectively, 45 percent of violent crimes were cleared. Among the violent offenses, the rates were 65 percent for murder, 52 percent for forcible rape, 24 percent for robbery, and 56 percent for aggravated assault. Clearances for crimes against persons (murder, forcible rape, and aggravated assault) are generally higher as more intense investigative efforts are often given these offenses and witnesses are frequently available to identify the perpetrators.

The overall property crime clearance rate was 18 percent. Thirteen percent of the burglaries, 20 percent of the larceny-thefts, 14 percent of motor vehicle thefts, and 15 percent of arsons were cleared during the year.

When considering the Modified Crime Index total which includes arson, the overall clearance rate remained the same, 21 percent.

The highest total Crime Index clearance rates geographically were registered in the Southern and Western States, each with 22 percent. Following were the Northeastern and Midwestern States, each with 21 percent. For violent crime overall, the highest clearance rate was recorded in the South with 48 percent. In the West, the rate was 46 percent, in the Northeast, 41 percent, and in the Midwest, 40 percent. Property crime clearance rates were 18 percent in the Midwest, South, and West and 17 percent in the Northeast.

By community type, city law enforcement agencies showed clearances for 21 percent of the Crime Index offenses brought to their attention. Those in suburban counties cleared 20 percent, and those in rural counties, 23 percent. Among the population groups, cities with 10,000 to 24,999 inhabitants registered the highest total Crime Index clearance rate, 26 percent. The highest violent crime clearance rates were recorded in the rural counties with 61 percent. Like Crime Index clearance rates, those for property crimes were highest for cities with populations from 10,000 to 24,999, at 23 percent. (See Table 25.)

Clearances Involving Only Persons under 18 Years of Age

Involvement of juveniles in crime can be measured by the number of crimes in which they have been identified as the offenders. Even though no physical arrest has been made, a clearance by arrest is recorded when an offender under 18 years of age is cited to appear in juvenile court or before other juvenile authorities. Since the juvenile clearance percentages shown in this publication indicate only those offenses where no adults were involved, they should be considered a slight underestimation of juvenile involvement in crime. Juveniles (persons under 18 years of age) account for 26 percent of the United States population, according to 1992 Bureau of the Census estimates.

Twenty percent of the Crime Index offenses cleared by law enforcement during 1992 involved only young people under age 18. Persons in this age group accounted for 13 percent of the violent crime clearances and 23 percent of those for property crimes. Murder showed the lowest percentage of juvenile involvement (9 percent), while the highest percentage was shown for arson (42 percent).

Geographically, the Midwestern States recorded the largest percentage of Crime Index offense involvement by the under-18 age group—22 percent. Juveniles alone were the offenders in 21 percent of the clearances in the Western States, 19 percent of those in the Southern States, and 18 percent of those in the Northeastern States.

[1] Includes offenses cleared by exceptional means.

[2] The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. It is not necessary to report clearances by detailed property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[3] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4] Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[5] Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

---

[1] Includes offenses cleared by exceptional means.

[2] The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. It is not necessary to report clearances by detailed property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[3] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4] Property crimes are offenses of burglary, larceny–theft, and motor vehicle theft. Data are not included for the property crime of arson.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

Table 27.—Offenses Known Breakdown and Percent Cleared by Arrest[1], Population Group, 1992

[1992 estimated population]

Population Group	Forcible rape		Robbery				Aggravated assault				Burglary			Motor vehicle theft			Arson[2]

[1] Includes offenses cleared by exceptional means.

[2] The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. It is not necessary to report clearances by detailed property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[3] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4] Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[5] Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities are also included in other groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

SECTION IV

Persons Arrested

Primarily a gauge of law enforcement's response to crime, arrest counts also provide definitive data concerning the age, sex, and race of perpetrators. Arrest practices, policies, and enforcement emphases vary from place to place and even within a community from time to time as, for example, during a local police campaign against residential burglary. While the practices for certain unlawful conduct such as drunkenness, disorderly conduct, vagrancy, and related violations may differ among agencies, those for robbery, burglary, and other serious crime arrests are more likely to be uniform and consistent throughout all jurisdictions. The Program's procedures require that an arrest be counted on each separate occasion a person is taken into custody, notified, or cited. Annual arrest figures do not measure the number of individuals arrested since one person may be arrested several times during the year for the same or different offenses.

Nationwide, law enforcement agencies effected an estimated 14.1 million arrests in 1992 for all criminal infractions except traffic violations. The highest arrest counts among the specific crime categories were for driving under the influence, 1.6 million; larceny-theft, 1.5 million; and simple assault and drug abuse violations, each 1.1 million. (See Table 29.)

When the overall arrest volume was related to the total United States population, the rate was 5,566 arrests per 100,000 inhabitants. Among the city population groupings, those with more than 250,000 inhabitants recorded the highest rate, 7,203, while those with populations from 10,000 to 24,999 recorded the lowest rate, 5,386. (See Table 31.) For suburban county agencies overall, the arrest rate was 4,138, and for rural county law enforcement, it was 4,063 per 100,000 inhabitants. Regionally, the arrest rates per 100,000 population ranged from 5,004 in the Midwest to 5,781 in the South. (See Table 30.)

Arrest Trends

The national total number of arrests for all offenses except traffic violations showed virtually no change in 1992 as compared to the 1991 volume, while overall Crime Index arrests fell 2 percent and property crime arrest totals declined 3 percent. An increase of 2 percent was reported for violent crime arrests. During the same time period, adult arrests for all offenses declined 1 percent, for Crime Index offenses declined 2 percent, and for property crimes dropped 4 percent. A 2-percent increase was, however, registered for violent crime arrests of adults. The juvenile arrest volume, 1992 versus 1991, showed increases of 3 percent for total arrests, 1 percent for Index crimes, and 5 percent for violent crimes. Juvenile arrests for property crime showed virtually no change for the 2-year period. (See Table 36.)

Two-year arrest trends for rural county agencies showed a 1-percent increase, 1992 over 1991, while those for city agencies showed no change and for suburban county agencies, a 1-percent decrease. (See Tables 44, 50, and 56.)

For the 5-year period, 1988 versus 1992, total arrests were up 7 percent, adult arrests up 6 percent, and juvenile arrests up 11 percent. (See Table 34.) Total Crime Index arrests rose 7 percent; those of adults, 5 percent; and those of juveniles, 12 percent. During the same years, 1988-1992, total violent crime arrests increased 23 percent, and property crime arrests were up 3 percent.

For the decade, 1983-1992, arrests for all offenses were up 20 percent; Crime Index arrests, 22 percent; violent crime arrests, 51 percent; and property crime arrests, 14 percent.

The 1992 drug abuse violation arrest total was up 7 percent from the 1991 level, less than 1 percent lower than in 1988, and 57 percent higher than in 1983. The following table shows the types of drugs involved in violations resulting in arrests during 1992 by geographic region.

Table 4.1—Arrests for Drug Abuse Violations, 1992

[Percent distribution]

	United States total	North-eastern States	Mid-western States	South-ern States	Western States
Total[1]	100.0	100.0	100.0	100.0	100.0
Sale/manufacture:	31.7	43.4	30.2	28.6	26.9
Heroin or cocaine and their derivatives	20.6	35.5	11.4	17.9	15.7
Marijuana	6.6	5.7	7.8	6.9	6.4

Other dangerous nonnarcotic drugs	9.2	2.1	8.8	5.1	18.9

[1] Because of rounding, percentages may not add to totals.

Age

Six percent of all persons arrested nationally in 1992 were under the age of 15; 16 percent were under 18; 29 percent were under 21; and 45 percent were under 25. Persons in the under-25 age group accounted for 46 percent of arrests in the cities, 41 percent of those in the suburban counties, and 38 percent of those in the rural counties.

Age distribution figures for persons arrested for Crime Index offenses showed 29 percent were under the age of 18; 43 percent, under 21; and 56 percent, under 25. The under-25 age group was also responsible for 47 percent of the violent crime arrests and 59 percent of property crime arrests in 1992.

Larceny-theft was the offense resulting in the most arrests of persons under age 18, while adults were most often arrested for driving under the influence. (See Table 38.)

Sex

Eighty-one percent of the persons arrested in the Nation during 1992 were males. (See Table 42.) They accounted for 78 percent of Index crime arrests, 88 percent of those for violent crimes, and 74 percent of the property crime arrests. Men were most often arrested for driving under the influence, which accounted for 12 percent of all male arrests.

As in past years, larceny-theft was the crime for which females were most often arrested. This single offense accounted for 76 percent of arrests of women for Index crimes and 18 percent of all female arrests. Fifty-two percent of all female larceny-theft arrestees were under 25 years of age.

Two-year trends showed virtually no change in the number of male arrests from 1991 to 1992, while female arrests were up 2 percent for the same period. (See Table 37.) Arrests of males were up 5 percent and those of females up 14 percent for the 5-year period from 1988 to 1992.

Race

Race distribution figures for the total number of arrests in the United States during 1992 showed 68 percent of the arrestees were white, 30 percent were black, and the remainder were of other races. (See Table 43.) Whites accounted for 63 percent of the Index crime arrests, 54 percent of the arrests for violent crimes, and 66 percent of those for property crimes.

Table 29.—Total Estimated Arrests[1], United States, 1992

TOTAL[2]	14,075,100
Murder and nonnegligent manslaughter	22,510

---

[1] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[2] Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.
[3] Includes arson. Population figures were rounded to the nearest thousand. All rates were calculated before rounding.

[1] Includes only suburban county law enforcement agencies.

[2] Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

[3] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4] Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[5] Includes arson. Population figures were rounded to the nearest thousand. All rates were calculated before rounding.

[1] Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

[2] Because of rounding, the percentages may not add to total.

[3] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4] Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[5] Includes arson.

Table 68.—Arrests by State, 1992

[1992 estimated population] Leaders indicate zero data.

State	Total[1] all classes	Crime[2] Index total	Violent[3] crime	Property[4] crime	Murder and non-negligent man-slaughter	Forcible rape	Robbery	Aggra-vated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson	Other assaults	Forgery and counter-feiting	Fraud

[1] Does not include traffic arrests.

[2] Includes arson.

[3] Violent crime includes offenses of murder, forcible rape, robbery, and aggravated assault.

[4] Property crime includes offenses of burglary, larceny-theft, motor vehicle theft, and arson.

NOTE: Direct comparisons of arrest totals listed in this table should not be made with prior years' issues. Some Part II offenses are not considered crimes in some States; therefore figures may vary widely.

---

[1] Includes all offenses except traffic and neglect cases.

[2] Because of rounding, the percentages may not add to total.

[3] Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are included in other groups.

SECTION V

New Perspectives On UCR Data

The UCR Program collects data on elements relating to crime and criminal activity in order to provide information on a "range" of criminal justice issues. While the ultimate "range" of UCR information is unknown, experience has shown it is much broader than it appears on the surface. The wider the "range" of information can be made, the greater is the utility of the UCR Program. A way to broaden the "range" (and thus increase the value of UCR) is to unveil "hidden" information through the use of analytic techniques.

In this section, burglary and automobile theft data were chosen to demonstrate the types of latent information that become available through analytic models. For burglary, the percents of households being burglarized are examined in terms of the lapse of time and the multiplicity of burglary victimizations. For example, the results show that nationwide one of three households will be burglarized at least once over a period of 20 years.

Automobile theft is viewed from two perspectives; its probability in terms of the number of automobiles owned (by a family or by an individual) and in terms of the duration of ownership. In contrast to residential burglary findings, less than 10 percent of the one-automobile owners will experience automobile theft(s) during a decade.

The computation of such data is only possible through the application of analytical models to raw UCR data in conjunction with data from other sources. Once derived, however, the "hidden" information lends a new dimension in the measurement of crime prevalence.

Analytic methods require certain simplifications with respect to how things work, function, or relate in the real world. These simplifications, called assumptions, are discussed in detail at the end of this study. In general, although no household is identical to another in terms of the probability of being burglarized, this model assumed the probability of residential burglary to be homogeneous (uniform) and independent for all households in the area (region, Nation, etc.). Similarly for auto theft, the likelihood of a car being stolen is considered uniform and independent for all types. These assumptions allow assessments of the long-term likelihood of residential burglary and auto theft at the regional and national levels.

Percent of Households Experiencing Residential Burglary

The estimated number of reported residential burglaries was 2,088,343 for the Nation during the year 1991. The estimated number of households for the latest available year (1991) was 104,592,000.[1] Therefore, nationwide, the residential burglary rate is computed to be 20.0 per 1,000 households. For simplicity, the residential burglary rate per 1,000 households will be referred to as the burglary rate. The following table offers the basis of computation for regional burglary rates.

Table 5.1

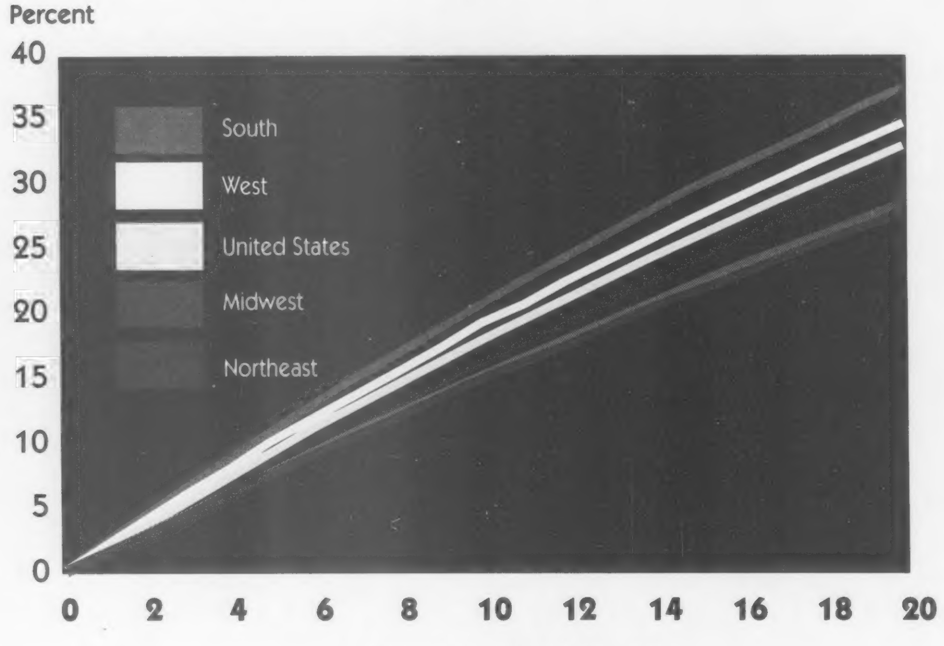
Residential Burglary Rates, Region, United States, 1991

Region	Number of Residential Burglaries	Number of Households	Burglary Rates Per 1,000 Households
Northeast	345,974	21,093,000	16.4
Midwest	420,886	24,987,000	16.8
South	865,403	36,984,000	23.4
West	456,080	21,528,000	21.2
U.S.	2,088,343	104,592,000	20.0

To view these rates from a different perspective, they were applied in a mathematical formula[2] to compute the percentages of households experiencing one or more residential burglaries.[3] Since the 1991 experience was assumed to hold steady throughout the time interval, the results demonstrate the likelihood of household burglary over time if the current rates held steady throughout the timespan. They do not predict future experiences.

CHART 5.1

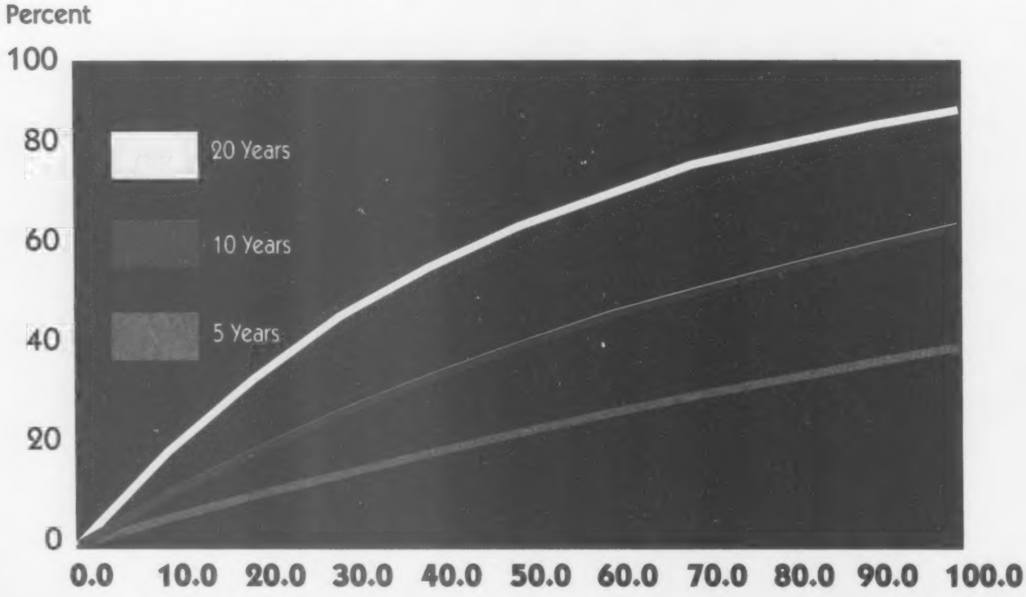
RESIDENTIAL BURGLARY RATES REGION, UNITED STATES, 1991



LAPSE OF TIME (YEARS)

CHART 5.2

PERCENT OF HOUSEHOLDS EXPERIENCING AT LEAST ONE BURGLARY, RATE AND TIME LAPSE, UNITED STATES



RESIDENTIAL BURGLARY RATE PER 1,000 HOUSEHOLDS

In Table 5.2, a household is counted as victimized if at least one burglary was experienced in a prescribed timeframe. For example, in the Southern Region, which experiences the highest residential burglary rate of 23.4 per 1,000 households, nearly 4 out of 10 households (37.5 percent) are victimized in a 20-year span.

Table 5.2

Percent of Households Experiencing At Least One Burglary, Region and Time Lapse, United States

	Time Lapse (Years)				
Region	1	5	10	15	20
Northeast	1.6%	7.9%	15.2%	21.9%	28.0%
Midwest	1.7	8.1	15.5	22.4	28.7
South	2.3	11.1	20.9	29.7	37.5
West	2.1	10.1	19.1	27.3	34.6
U.S.	2.0%	9.5%	18.1%	25.9%	33.0%

Chart 5.1 depicts graphically the percent of households in the areas that experience at least one residential burglary in the prescribed lapse of time.[4] This exhibit is an extension of Table 5.2 in that percent figures are expressed for all timeframes incrementally up to 20 years, instead of prescribed 1, 5, 10, 15, and 20 years as in Table 5.2. As a case in point, during a 12-year interval, approximately 25 percent of the households in the Northeastern Region will experience burglary.

Chart 5.2 describes graphically the percent of households that experience at least one residential burglary in terms of the burglary rate (under the three options of time lapse; 5 years, 10 years, and 20 years).[5] This exhibit is also an expansion of Table 5.2 in that percent figures are depicted for any burglary rate ranging from zero to 100 residential burglaries (per 1,000 households). If an area experienced a burglary rate of 50 per 1,000 households, for instance, the graph shows that 40 percent of the households in that area are burglarized at least once during the 10-year period.

The percent of households experiencing two or more residential burglaries in a given interval of time[6] is shown in Table 5.3 below. As can be seen, the likelihood of multiple victimizations is much lower.

Table 5.3

Percent of Households Experiencing Two or More Burglaries, Region and Time Lapse, United States

	Time Lapse (Years)				
Region	1	5	10	15	20
Northeast	.01%	.3%	1.2%	2.6%	4.4%
Midwest	.01	.3	1.3	2.7	4.6
South	.03	.6	2.4	4.9	8.1
West	.02	.5	2.0	4.1	6.8
U.S.	.02%	.5%	1.8%	3.7%	6.2%

Chart 5.3 portrays the percent of households for each region that experience two or more residential burglaries in terms of the lapse of time.[7] It is a counterpart of Chart 5.1 for at least two-burglary situations.

Again, Chart 5.4 gives a general perspective of burglary victimization as in Chart 5.2. It describes the percent of households experiencing at least two residential burglaries.[8] It should be observed that the graphs in Chart 5.3 and 5.4 are substantially lower than those in Chart 5.1 and 5.2, respectively.

Percent of Automobile Owners Experiencing Automobile Theft

Nationwide, there were 1,324,405 estimated automobile thefts in 1991.[9] The number of registered automobiles in the Nation was 142,955,623.[10] Therefore, the automobile theft rate per 1,000 registered automobiles is computed to be 9.3 in 1991 for the Nation. Regional data are set forth in Table 5.4.

CHART 5.3

PERCENT OF HOUSEHOLDS EXPERIENCING TWO OR MORE BURGLARIES, REGIONAL TIME LAPSE, UNITED STATES

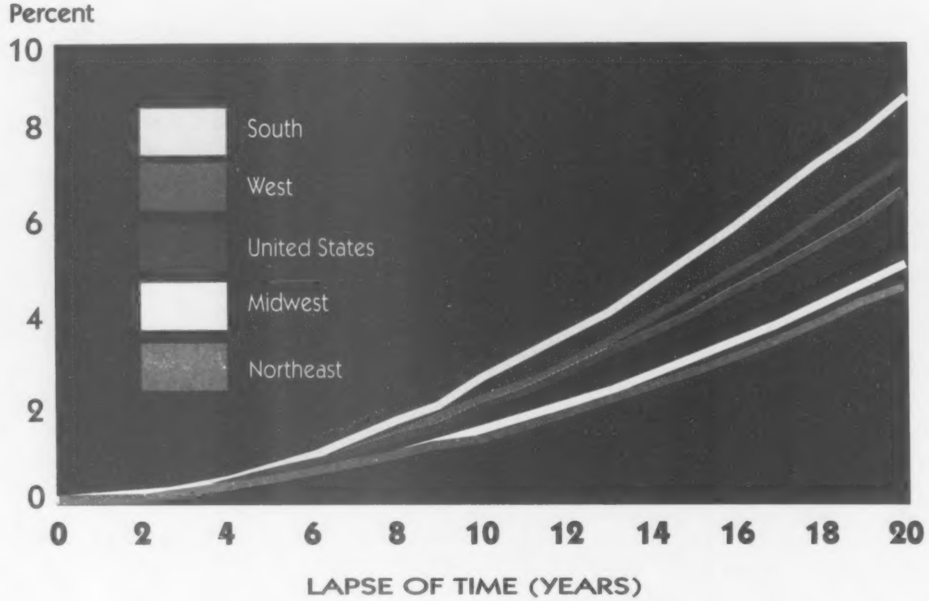


CHART 5.4

PERCENT OF HOUSEHOLDS EXPERIENCING TWO OR MORE BURGLARIES, RATE AND TIME LAPSE

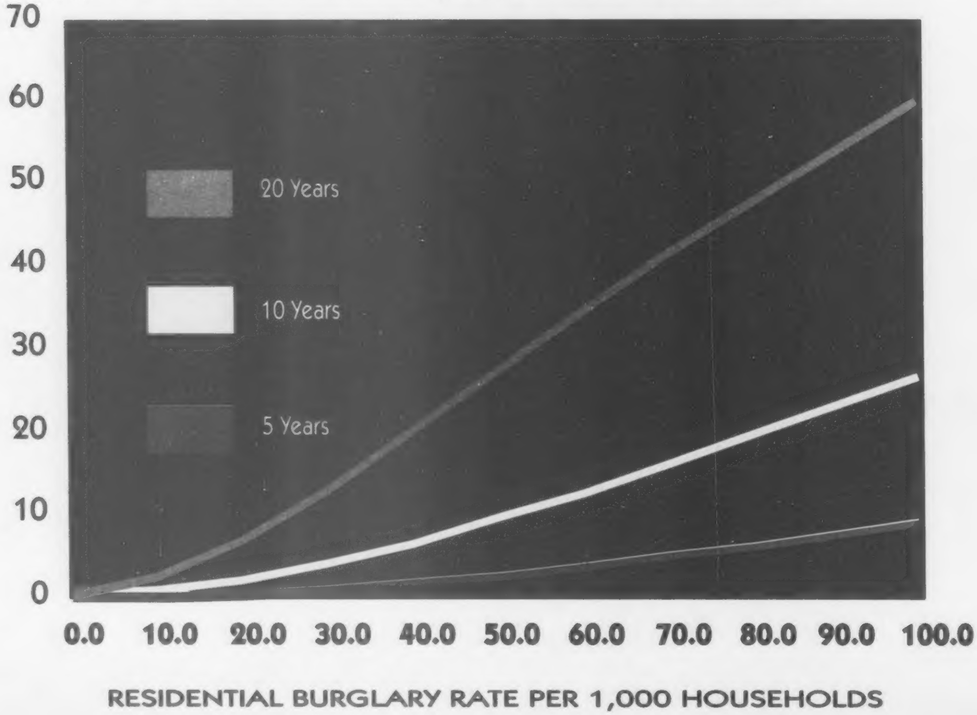

Table 5.4

Automobile Theft Rates, Region, United States, 1991

Region	Number of Automobile Thefts	Number of Registered Automobiles	Rate per 1,000 Registered Automobiles
Northeast	376,341	27,899,176	13.5
Midwest	254,022	35,260,022	7.2
South	390,586	48,808,855	8.0
West	303,456	30,987,570	9.8
U.S.	1,324,405	142,955,623	9.3

With respect to vehicle theft, this model addressed only automobile thefts; other types of UCR vehicle thefts such as trucks, buses, etc., were not included. As stated earlier, the vehicle theft rate differs in reality by the model/make of the vehicle, year of production, frequency of use, area of use, parking location, antitheft features of the vehicle, etc., the likelihood of theft was assumed uniform and independent for all automobiles in these computations. Again, the 1991 rates were assumed to extend through the entire timeframe under consideration.

A one-auto owner means an owner that possesses one automobile throughout the years under study. This implies that a one-auto owner immediately finds a replacement for an automobile stolen, so that the owner continues to remain as a one-auto owner. Since a replacement automobile (after a theft) can be stolen, a one-auto owner may experience multiple incidents of automobile thefts during a given interval of time. Two-auto and three-auto owners are similarly defined.

Tables 5.5, 5.6, and 5.7 were generated by expressing the percent of one-auto (two-auto, three-auto) owners to experience at least one automobile theft in a prescribed interval of time.[11] The Northeastern Region has the highest automobile theft chance among the four regions. Nationally, a one-auto owner has an 8.8-percent chance of experiencing at least one auto theft during a 10-year interval (Table 5.5). Similarly, a two-auto and three-auto owner has a 16.8-percent and a 24.1-percent chance, respectively, in the same timeframe (Tables 5.6 and 5.7).

Table 5.5

Percent of One-Auto Owners Experiencing One or More Automobile Thefts, Region and Time Lapse, United States

	Time Lapse (Years)				
Region	2	4	6	8	10

U.S.	5.3%	10.5%	15.3%	19.8%	24.1%

Assumptions of the Analytical Model

The following assumptions were made with respect to the occurrences of residential burglary and automobile theft.[12]

1. The offenses occur independently over non-overlapping time intervals.

2. The probability for a household to experience a given number of residential burglaries or an owner's car to be stolen during a time interval depends on the length of the interval, but not on the location of the interval. For example, frequency variations arising from season, day of the week, time of the day, etc., were not taken into consideration in this model. In particular, the 1991 burglary and auto theft rates were assumed to remain constant throughout the years under consideration.

3. The probability for a household to experience two or more residential burglaries or an owner to have two or more autos stolen in a short interval of time is small.

4. The probability for a household to experience one residential burglary or an owner to have one vehicle stolen in a short interval of time is approximately proportional to the lapse of time. For example, the probability of experiencing one residential burglary in 10 hours is approximately twice the probability of experiencing the same in 5 hours.

NOTES

1. Estimated by the U.S. Bureau of the Census.
2. For a household in the area whose burglary rate is B, the probability of experiencing N residential burglaries in the time interval of T years is Poisson distributed as

   $$Prob(N;T,B)=e^{-BT}\frac{(BT)^n}{N!}$$

   where $N=0,1,2,....$
3. Under the notation of 3, the probability is a cumulative exponential distribution: $P(N\geq 1;T,B)=1-e^{-BT}$, for a household.
4. Represents a cumulative exponential distribution in T for each region.
5. Represents a cumulative exponential distribution in B for a given lapse of time.
6. The probability is given by $P(N\geq 2;T,B)=1-(1+BT)e^{-BT}$.
7. Represents a cumulative gamma distribution in T for each region.
8. Represents a cumulative gamma distribution in B for a given lapse of time.
9. Excludes UCR "trucks and buses" and "other vehicle" categories.
10. Estimated by the Federal Highway Administration.
11. The probability is given by $P(N\geq;T,V,K)=1-e^{-TVK}$, where V is the automobile theft rate (per registered automobile) and K is the number of automobiles that an owner possesses (e.g., K=1 means a one-vehicle owner).
12. Referred to as the Poisson postulates.

SECTION VI

Law Enforcement Personnel

The Nation's law enforcement community employed an average of 2.3 full-time officers for every 1,000 inhabitants as of October 31, 1992. Considering full-time civilians, the overall law enforcement employee rate was 3.1 per 1,000 inhabitants according to 13,032 city, county, and state police agencies reporting in 1992. These agencies collectively offered law enforcement service to a population of over 241 million, employing 544,309 officers and 204,521 civilians. A listing of reported full-time law enforcement officers and civilian employees by state is shown in Table 77.

Varying demographic and other jurisdictional characteristics greatly affect the requirements for law enforcement service from one locale to another. The needs of a community having a highly mobile or seasonal population, for example, may be very different from those of a city whose population is relatively stable. Similarly, a small community situated between two large cities may require a greater number of law enforcement personnel than a community of the same size which has no urban centers nearby.

The functions of law enforcement are also significantly diverse throughout the Nation. In certain areas, sheriffs' responsibilities are limited almost exclusively to civil functions and/or the administration of the county jail facilities. Likewise, the responsibilities of state police and highway patrol agencies vary from one jurisdiction to another.

In view of these differing service requirements and responsibilities, care should be used when attempting any comparison of law enforcement employee rates. The rates presented in the following tables represent national averages; they should be viewed as guides or indicators, not as recommended or desirable police strengths. Adequate personnel for a specific locale can be determined only after careful study and analysis of the various conditions affecting service requirements in that jurisdiction.

The law enforcement employee average for all cities nationwide in 1992 was 2.8 per 1,000 inhabitants. The Nation's smallest cities, those with fewer than 10,000 inhabitants, employed 3.4 employees per 1,000 population, while for the largest cities (over 250,000 population) the rate was 3.6 per 1,000. Cities with populations between 10,000 and 249,999 registered lesser rates ranging from 2.2 to 2.4 employees per 1,000 inhabitants. Rural and suburban counties averaged full-time law enforcement employee rates of 3.9 and 3.6 per 1,000 population, respectively. (See Table 70.)

Regionally, the law enforcement employee rate was highest in the South with 3.2, and lowest in the West, 2.4. (See Table 70.)

Sworn Personnel

Rates based solely on sworn law enforcement personnel (excluding civilians) showed the national average for all cities was 2.2 officers per 1,000 inhabitants. By population grouping, the rates ranged from 1.7 for cities with populations of 25,000 to 99,999 to 2.8 in cities with 250,000 or more inhabitants. Suburban county law enforcement agencies averaged 2.3 officers per 1,000 population, while agencies in rural counties averaged 2.5. (See Table 71.)

Geographically, the highest rate of officers to population was recorded in the Southern States with 2.5 officers per 1,000 inhabitants. Following were the Northeastern States with 2.4, the Midwestern States with 2.1, and the Western States with 1.7.

Males comprised 91 percent of all sworn employees nationally. Ninety-three percent of the officers in rural counties, 91 percent of those in cities, and 89 percent in suburban counties were males.

Civilian Employees

Civilians made up 27 percent of the total United States law enforcement employee force in 1992. They represented 22 percent of the police employees in cities, 34 percent of those in rural counties, and 36 percent of the suburban county law enforcement strength. Thirty-six percent of all civilian employees were males.

Law Enforcement Officers Killed and Assaulted

Sixty-one law enforcement officers were feloniously slain in the line of duty during 1992, 10 fewer than in 1991. Accidents occurring while performing official duties claimed the lives of an additional 66 officers in 1992. The 1992 total for officers accidentally killed was 14 higher than the 1991 total of 52.

Extensive data on line-of-duty deaths and assaults on city, county, state, and Federal officers can be found in the Uniform Crime Reporting publication, *Law Enforcement Officers Killed and Assaulted.*

Table 70.—Full-time Law Enforcement Employees[1], Number and Rate per 1,000 Inhabitants, Geographic Region and Division by Population Group, October 31, 1992

[1992 estimated population]

SECTION VII

APPENDIX I

Methodology

The information compiled by UCR contributors is forwarded to the FBI either directly from the local law enforcement agencies or through state-level UCR Programs in 42 states and the District of Columbia. Agencies submitting directly to the FBI are provided continuing guidance and support on an individual basis.

State-level UCR Programs are very effective intermediaries between local contributors and the FBI. Many of the Programs have mandatory reporting requirements and collect data beyond the national UCR scope to address crime problems germane to their particular locales. In most cases, these agencies are also able to provide more direct and frequent service to participating law enforcement agencies, to make information more readily available for use at the state level, and to contribute to more streamlined operations at the national level.

With the development of a state UCR Program, the FBI ceases direct collection of data from individual law enforcement agencies within the state. Instead, information from local agencies is forwarded to the national Program through the state data collection agency.

The conditions under which these systems are developed ensure consistency and comparability in the data submitted to the national Program, as well as provide for regular and timely reporting of national crime data. These conditions are: (1) The state Program must conform to national Uniform Crime Reports' standards, definitions, and information requirements. The states are not, of course, prohibited from collecting other statistical data beyond the national requirements. (2) The state criminal justice agency must have a proven, effective, statewide Program and have instituted acceptable quality control procedures. (3) Coverage within the state by a state agency must be, at least, equal to that attained by the national Uniform Crime Reports. (4) The state agency must have adequate field staff assigned to conduct audits and to assist contributing agencies in record practices and crime reporting procedures. (5) The state agency must furnish to the FBI all of the detailed data regularly collected by the FBI in the form of duplicate returns, computer printouts, and/or magnetic tapes. (6) The state agency must have the proven capability (tested over a period of time) to supply all the statistical data required in time to meet national Uniform Crime Reports' publication deadlines.

To fulfill its responsibilities in connection with the UCR Program, the FBI continues to edit and review individual agency reports for both completeness and quality; has direct contact with individual contributors within the state when necessary in connection with crime reporting matters, coordinating such contact with the state agency; and upon request, conducts training programs within the state on law enforcement records and crime reporting procedures. Should circumstances develop whereby the state agency does not comply with the aforementioned requirements, the national Program may reinstitute a direct collection of Uniform Crime Reports from law enforcement agencies within the state.

Reporting Procedures

Based on records of all reports of crime received from victims, officers who discover infractions, or other sources, law enforcement agencies across the country tabulate the number of Crime Index or Part I offenses brought to their attention each month. Specifically, the crimes reported to the FBI are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson.

Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from an agency's count. The number of "actual offenses known" is reported to the FBI regardless of whether anyone is arrested for the crime, stolen property is recovered, or prosecution is undertaken.

Another integral part of the monthly submission is the total number of actual Crime Index offenses cleared. Crimes are "cleared" in one of two ways: (1) at least one person is arrested, charged, and turned over to the court for prosecution; or (2) by exceptional means when some element beyond law enforcement control precludes the arrest of an offender. Law enforcement agencies also report the number of Index crime clearances which involve only offenders under the age of 18; the value of property stolen and recovered in connection with the offenses; and detailed information pertaining to criminal homicide and arson.

In addition to its primary collection on Crime Index (Part I) offenses, the UCR Program solicits monthly data on persons arrested for all crimes except traffic violations.

The age, sex, and race of arrestees are reported by crime category, both Part I and Part II. Part II offenses include all crimes not classified as Part I.

Various data on law enforcement officers killed or assaulted are collected on a monthly basis. The number of full-time sworn and civilian personnel is reported as of October 31 each year.

Editing Procedures

Each report submitted to the UCR Program is examined thoroughly for arithmetical accuracy and for deviations which may indicate errors. To identify any unusual fluctuations in an agency's crime counts, monthly reports are compared with previous submissions of the agency and with those for similar agencies. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in the jurisdiction's geopolitical structure.

Data reliability is a high priority of the Program and noted deviations or arithmetical adjustments are brought to the attention of the state UCR Program or the submitting agency through correspondence. A standard procedure of the FBI is to study the monthly reports and to evaluate periodic trends prepared for individual reporting units. Any significant increase or decrease is made the subject of a special inquiry. When it is found that changes in crime reporting procedures or annexations are influencing the level of crime, the figures for specific crime categories, or if necessary, totals are excluded from trend tabulations.

To assist contributors in complying with UCR standards, the national Program provides training seminars and instructional materials in crime reporting procedures. Throughout the country, liaison with state Programs and law enforcement personnel is maintained, and training sessions are held to explain the purpose of the Program, the rules of uniform classification and scoring, and the methods of assembling the information for reporting. When an individual agency has specific problems in compiling its crime statistics and remedial efforts are unsuccessful, FBI Headquarters' personnel may visit the contributor to aid in resolving the difficulties.

The *Uniform Crime Reporting Handbook*, which details procedures for classifying and scoring offenses, is supplied to all contributors as the basic resource document for preparing reports. Since a good records system is essential for accurate crime reporting, the FBI also furnishes the *Manual of Law Enforcement Records.*

To enhance communication among Program participants, the UCR "Newsletter" and State UCR Program "Bulletin" are utilized. They address Program policy, as well as present information and instructional material, and are produced as needed.

The final responsibility for data submissions rests with the individual contributing law enforcement agency. Although the Program makes every effort through its editing procedures, training practices, and correspondence to assure the validity of the data it receives, the statistics' accuracy depends primarily on the adherence of each contributor to the established standards of reporting. Deviations from these established standards which cannot be resolved by the national UCR Program may be brought to the attention of the Committee on Uniform Crime Records of the International Association of Chiefs of Police or the Committee on Uniform Crime Reporting of the National Sheriffs' Association.

Offense Estimation

Tables 1 through 5 and 7 of this publication contain statistics for the entire United States. Because not all law enforcement agencies provide data for complete reporting periods, estimated crime counts are included in these presentations. Offense estimation occurs within each of three areas: Metropolitan Statistical Areas (MSAs), cities outside MSAs, and rural counties. Using the known crime experiences of similar areas within a state, the estimates are computed by assigning the same proportional crime volumes to nonreporting agencies.

Unique estimation procedures were used to produce estimated 1985 through 1992 forcible rape figures for the state of Illinois. In mid-1984, gender-neutral sex offense legislation was passed in that state. As a result, forcible rape figures furnished by the state-level UCR Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Forcible rape totals are not shown in Tables 6 and 8 through 11, which present individual city, county, university/college, and MSA data for Illinois agencies. Since the data supplied were not comparable with those provided for other agencies across the country, the post-1984 forcible rape figures have been estimated using national rates per 100,000 inhabitants within the eight population groups and assigning the forcible rape volumes proportionally.

Due to reporting problems at the state levels, no usable 1988 data were received for local law enforcement agencies in Florida and Kentucky. For Table 1 of this publication, 1988 offense totals for these two states were estimated. Previous valid annual totals, by population group, were updated for the states by applying percentage changes for each offense within each population group of the geographic division in which the state resides. The state totals were compiled from the sums of the population group estimates. Reporting recommenced for both states during 1989, and usable data have since been received.

This same procedure was used to estimate Iowa crime counts for 1991. Because of efforts to convert to the

National Incident-Based Reporting System within that state, no summary totals for local law enforcement agencies could be generated for that annual period. The conversion was successful and Iowa figures were available for 1992.

Crime Trends

Showing fluctuations from year to year, trend statistics offer the data user an added perspective from which to study crime. Percent change tabulations in this publication are computed only for reporting units which have provided comparable data for the periods under consideration. Exclusions from trend computations are made when figures from a reporting agency are not received for comparable timeframes or when it is ascertained that unusual fluctuations are due to such variables as improved records procedures, annexations, etc.

Care should be exercised in any direct comparison between data in this publication and those in prior issues of *Crime in the United States*. Valid percent changes for 2-, 5-, and 10-year periods are presented in this book's tabular portions.

Table Methodology

Although most law enforcement agencies submit crime reports to the UCR Program, data are sometimes not received for complete annual periods. To be included in this publication's Tables 8 through 11, showing specific jurisdictional statistics, figures for all 12 months of the current year must have been received at the FBI prior to established publication deadlines. Other tabular presentations are aggregated on varied levels of submission. Unless consisting of estimates for the total United States population, each table in this publication shows the number of agencies reporting and the extent of population coverage.

Designed to assist the reader, this appendix explains the construction of many tabular presentations in the book. The following key refers to the columnar headings used throughout the appendix.

Key: A) Column 1 shows the table numbers. Included are Tables 1 through 69, *Crime in the United States – 1992.*

B) Column 2 indicates the level of submission necessary for an agency's statistics to be included in a table.

C) Column 3 explains how each table was constructed. Data adjustments, if any, are discussed along with various definitions of data aggregation.

D) Column 4 contains general comments regarding the potential use and misuse of the statistics presented.

(1) Table	(2) Data Base	(3) Table Construction	(4) General Comments
1	All law enforcement agencies in the UCR Program (including those submitting less than 12 months).	The 1992 statistics are consistent with Table 2. Pre-1992 crime statistics may have been updated, and hence, may not be consistent with prior publications. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for each year. Population statistics represent July 1 provisional estimations for each year except 1970, 1980, and 1990, which are Bureau of the Census decennial census data (see App. III). Crime volume statistics are rounded to the nearest 10 for violent crime and the nearest 100 for property crime. Percent changes and rates are computed prior to rounding.	Represents an estimation of national reported crime activity from 1973 through 1992.
2	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1992).	Statistics are aggregated from individual state statistics as shown in Table 5. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent July 1, 1992, Bureau of the Census provisional estimates. See Appendix III for UCR population breakdowns.	Represents an estimation of national reported crime activity in 1992.
3	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1992).	Regional offense distributions are computed from volume figures as shown in Table 4. Population distributions are based on July 1, 1992, Bureau of the Census provisional estimates (see App. III).	Represents the 1992 geographical distribution of estimated Crime Index offenses and population.
4	All law enforcement agencies in the UCR Program (including those submitting less than 12 months).	The 1992 statistics are aggregated from individual state statistics as shown in Table 5. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for 1991 and 1992. Population statistics represent July 1 provisional estimates for 1991 and 1992.	Represents an estimation of reported crime activity for Index offenses at the: 1. national level 2. regional level 3. division level 4. state level Any comparison of UCR statistics should take into consideration demographic factors.
5	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1992).	Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent 1992 estimates (see App. III). Statistics under the heading "Area Actually Reporting" represent reported offense totals for agencies submitting 12 months of offense reports and estimated totals for agencies submitting less than 12 but more than 2 months of offense reports. The statistics under the heading "Estimated Totals" represent the above plus estimated offense totals for agencies having less than 3 months of offense reports.	Represents an estimation of reported crime activity for Index offenses at the state level. Any comparison of UCR statistics should take into consideration demographic factors.
6	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1992.)	Statistics are published for all Metropolitan Statistical Areas (MSAs) having at least 75% reporting and the central cities submitted 12 months of data in 1992. Figures are listed for central cities of the MSAs if the cities submitted 12 months of data in 1992. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense statistics for 1992. Population statistics represent July 1, 1992, Bureau of the Census provisional estimates. The statistics under the heading "Area Actually Reporting" represent reported offense totals for agencies submitting all 12 months of offense reports plus estimated offense totals for agencies submitting less than 12 but more than 2 months of offense reports. The statistics under the heading "Estimated Total" represent the above plus the estimated offense totals for agencies submitting less than 3 months of offense reports. The tabular breakdowns are according to UCR definitions (see App. II).	Represents an estimation of the reported crime activity for Index offenses at individual MSA level. Any comparison of UCR statistics should take into consideration demographic factors.
7	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1992).	Offense totals are for all Index offense categories other than aggravated assault. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for each year.	Represents an estimation of national reported crime activity from 1988 through 1992. Aggravated assault is excluded from Table 7, because if money or property is taken in connection with an assault the offense is robbery.
8	All law enforcement agencies submitting complete reports for 12 months in 1992.	"Cities and Towns" are defined to be agencies in Population Groups I through V (App. III). The agency populations are 1992 estimates for each agency (see App. III).	Represents reported crime activity of individual agencies in cities and towns 10,000 and over in population. Any comparison of UCR statistics should take into consideration demographic factors.

(1) Table	(2) Data Base	(3) Table Construction	(4) General Comments
9	All university/college law enforcement agencies submitting complete reports for 12 months in 1992.	The 1991 student enrollment figures, which are provided by the U. S. Department of Education, are the most recent available. They include full- and part-time students. No adjustments to equate part-time enrollments into full-time equivalents have been made.	Represents reported crime from those individual university/college law enforcement agencies contributing to the UCR Program. These agencies are listed alphabetically by state. Any comparison of these UCR statistics should take into consideration size of enrollment, number of on-campus residents, plus other demographic factors.
10	All law enforcement agencies submitting complete reports for 12 months in 1992.	"Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III). Population estimates of suburban counties are as of July 1, 1992.	Represents crime reported to individual law enforcement agencies in suburban counties; i.e., the individual sheriff's office, county police department, highway patrol, and/or state police. These figures do not represent the county totals since they exclude city crime counts. Any comparison of UCR statistics should take into consideration demographic factors.
11	All law enforcement agencies submitting complete reports for 12 months in 1992.	"Rural Counties" are those outside MSAs and whose jurisdictions are not covered by city police agencies (App. III). Population classifications of rural counties are based on 1992 estimates for individual agencies (see App. III).	Represents crime reported to individual rural county law enforcement agencies covering populations 25,000 and over, i.e., the individual sheriff's office, county police department, highway patrol, and/or state police. These figures do not represent the county totals since they exclude city crime counts. Any comparison of UCR statistics should take into consideration demographic factors.
12-15	All law enforcement agencies submitting complete reports for at least 6 common months in 1991 and 1992.	The 1992 crime trend statistics are 2-year comparisons based on 1992 reported crime activity. Only common reported months for individual agencies are included in 1992 trend calculations. Populations represent July 1, 1992, estimates for individual agencies. See Appendix III for UCR population breakdowns. Note that "Suburban and Nonsuburban Cities" are all municipal agencies other than central cities in MSAs.	Slight decrease in national coverage for Table 15 due to editing procedure and lower submission rate.
16-19	All law enforcement agencies submitting complete reports for 12 months in 1992.	The 1992 crime rates are the ratios of the aggregated 1992 crime volumes and the aggregated 1992 populations of the contributing agencies. Population statistics represent 1992 estimates for individual agencies. See Appendix III for UCR population breakdowns. Note that "Suburban and Nonsuburban Cities" are all municipal agencies other than central cities in MSAs.	The forcible rape figures furnished by the Illinois state-level UCR Program were not in accordance with national guidelines. For inclusion in these tables, the Illinois forcible rape figures were estimated by using the national rates for each population group applied to the population by group for Illinois agencies supplying all 12 months of data. Slight decrease in national coverage for Table 19 due to editing procedure and lower submission rate.
20	All law enforcement agencies submitting Supplementary Homicide Report (SHR) data in 1992.	The weapon totals are the aggregate for each murder victim recorded on the SHRs for calendar year 1992.	The SHR is the monthly report form concerning homicides. It details victim and offender characteristics, circumstances, weapons used, etc.
21, 22	All law enforcement agencies submitting complete reports for 12 months in 1992.	The weapon totals are aggregated 1992 totals. Population statistics represent 1992 estimates.	
23, 24	All law enforcement agencies submitting complete reports for at least 6 months in 1992.	Offense total and value lost total are computed for all Index offense categories other than aggravated assault. Percent distribution is derived based on offense total of each Index offense. Trend statistics are derived based on agencies with at least 6 common months complete for 1991 and 1992.	Aggravated assault is excluded from Table 23. For UCR Program purposes, the taking of money or property in connection with an assault is reported as a robbery.
25-28	All law enforcement agencies submitting complete reports for at least 6 months in 1992.	The 1992 clearance rates are based on offense and clearance volume totals of the contributing agencies for 1992. Population statistics represent 1992 estimates. See Appendix III for UCR population breakdowns.	
29	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1992).	The arrest totals presented are national estimates based on the arrest statistics of all law enforcement agencies in the UCR Program (including those submitting less than 12 months). The "Total Estimated Arrests" statistic is the sum of estimated arrest volumes for each of the 29 offenses. Each individual arrest total is the sum of the estimated volumes within each of the eight population groups (App. III). Each group's estimate is the reported volume (as shown in Table 26) divided by the percent of total group population reporting (according to 1992 Bureau of the Census provisional estimates; see App. III).	
30, 31	All law enforcement agencies submitting complete reports for 12 months in 1992.	The 1992 arrest rates are the ratios, per 100,000 inhabitants, of the aggregated 1992 reported arrest statistics and population. The population statistics represent July 1, 1992, estimates. See Appendix III for UCR population classifications/geographical configuration.	

(1) Table	(2) Data Base	(3) Table Construction	(4) General Comments
32, 33	All law enforcement agencies submitting complete reports for 12 months in 1983 and 1992.	The arrest trends are the percentage differences between 1983 and 1992 arrest volumes aggregated from all common agencies. Population statistics represent July 1, 1992, estimates (see App. III).	
34, 35	All law enforcement agencies submitting complete reports for 12 months in 1988 and 1992.	The arrest trends are the percentage differences between 1988 and 1992 arrest volumes aggregated from common agencies. Population statistics represent 1992 estimates (see App. III).	
36, 37	All law enforcement agencies submitting complete reports for 12 months in 1991 and 1992.	The arrest trends are 2-year comparisons between 1991 and 1992 arrest volumes aggregated from common agencies. Population statistics represent 1992 estimates (see App. III).	
38-43	All law enforcement agencies submitting complete reports for 12 months in 1992.		Slight decrease in coverage for Table 43 due to editing procedure and lower submission of race data.
44, 45	All city law enforcement agencies submitting complete reports for 12 months in 1991 and 1992.	The 1992 city arrest trends represent the percentage differences between 1991 and 1992 arrest volumes aggregated from common city agencies. "City Agencies" are defined to be all agencies within Population Groups I-VI (App. III).	
46-49	All city law enforcement agencies submitting complete reports for 12 months in 1991 and 1992.	"City Agencies" are defined as agencies within Population Groups I-VI (App. III).	Slight decrease in coverage for Table 49 due to editing procedure and lower submission of race data.
50, 51	All suburban county law enforcement agencies submitting complete reports for 12 months in 1991 and 1992.	The 1992 suburban county arrest trends represent percentage differences between 1991 and 1992 volumes aggregated from contributing agencies. "Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III).	
52-55	All suburban county law enforcement agencies submitting complete reports for 12 months in 1992.	"Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III).	Slight decrease in coverage for Table 55 due to editing procedure and lower submission of race data.
56, 57	All rural county law enforcement agencies submitting complete reports for 12 months in 1991 and 1992.	The 1992 rural county arrest trends represent percentage differences between 1991 and 1992 volumes aggregated from contributing agencies. "Rural Counties" are defined as noncity agencies outside MSAs (App. III).	
58-61	All rural county law enforcement agencies submitting complete reports for 12 months in 1992.	"Rural Counties" are defined as noncity agencies outside MSAs (App. III).	Slight decrease in coverage for Table 61 due to editing procedure and lower submission of race data.
62, 63	All suburban area law enforcement agencies submitting complete reports for 12 months in 1991 and 1992.	The 1992 suburban area arrest trends represent percentage differences between 1991 and 1992 arrest volumes aggregated from contributing agencies. "Suburban Area" is defined as cities with fewer than 50,000 inhabitants and all counties within MSAs (App. III).	
64-67	All suburban area law enforcement agencies submitting complete reports for 12 months in 1992.	"Suburban Area" is defined as cities with fewer than 50,000 inhabitants and all counties within MSAs (App. III).	Slight decrease in coverage for Table 67 due to editing procedure and lower submission of race data.
68	All law enforcement agencies submitting complete reports for 12 months in 1992.	Arrest totals are aggregated for individual agencies within each state. Population figures represent July 1, 1992, estimates (see App. III).	Any comparison of statistics should take into consideration variances in arrest practices, particularly for Part II crimes.
69	All law enforcement agencies submitting complete reports for 12 months in 1992.	Population statistics represent July 1, 1992, estimates for individual agencies. See Appendix III for definitions of the population classifications presented.	Data furnished are based upon individual state age definitions for juveniles.

APPENDIX II

Offenses in Uniform Crime Reporting

Offenses in Uniform Crime Reporting are divided into two groupings, Part I and Part II. Information on the volume of Part I offenses known to law enforcement, those cleared by arrest or exceptional means, and the number of persons arrested is reported monthly. Only arrest data are reported for Part II offenses.

The Part I offenses are:

Criminal homicide.—a. Murder and nonnegligent manslaughter: the willful (nonnegligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, accidental deaths, and justifiable homicides are excluded. Justifiable homicides are limited to: (1) the killing of a felon by a law enforcement officer in the line of duty; and (2) the killing of a felon by a private citizen. b. Manslaughter by negligence: the killing of another person through gross negligence. Traffic fatalities are excluded. While manslaughter by negligence is a Part I crime, it is not included in the Crime Index.

Forcible rape.—The carnal knowledge of a female forcibly and against her will. Included are rapes by force and attempts or assaults to rape. Statutory offenses (no force used—victim under age of consent) are excluded.

Robbery.—The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Aggravated assault.—An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

Burglary–breaking or entering.—The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

Larceny–theft (except motor vehicle theft).—The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles or automobile accessories, shoplifting, pocket-picking, or the stealing of any property or article which is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, "con" games, forgery, worthless checks, etc., are excluded.

Motor vehicle theft.—The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on the surface and not on rails. Specifically excluded from this category are motorboats, construction equipment, airplanes, and farming equipment.

Arson.—Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

The Part II offenses are:

Other assaults (simple).—Assaults and attempted assaults where no weapon is used and which do not result in serious or aggravated injury to the victim.

Forgery and counterfeiting.—Making, altering, uttering, or possessing, with intent to defraud, anything false in the semblance of that which is true. Attempts are included.

Fraud.—Fraudulent conversion and obtaining money or property by false pretenses. Included are confidence games and bad checks, except forgeries and counterfeiting.

Embezzlement.—Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

Stolen property; buying, receiving, possessing.—Buying, receiving, and possessing stolen property, including attempts.

Vandalism.—Willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or persons having custody or control.

Weapons; carrying, possessing, etc.—All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. Included are attempts.

Prostitution and commercialized vice.—Sex offenses of a commercialized nature, such as prostitution, keeping a bawdy house, procuring, or transporting women for immoral purposes. Attempts are included.

Sex offenses (except forcible rape, prostitution, and commercialized vice).—Statutory rape and offenses against chastity, common decency, morals, and the like. Attempts are included.

Drug abuse violations.—State and local offenses relating to the unlawful possession, sale, use, growing, and manufacturing of narcotic drugs. The following drug categories are specified: Opium or cocaine and their derivatives (morphine, heroin, codeine); marijuana; synthetic narcotics—manufactured narcotics that can cause true addiction (demerol, methadone); and dangerous nonnarcotic drugs (barbiturates, benzedrine).

Gambling.—Promoting, permitting, or engaging in illegal gambling.

Offenses against the family and children.—Nonsupport, neglect, desertion, or abuse of family and children.

Driving under the influence.—Driving or operating any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

Liquor laws.—State or local liquor law violations, except "drunkenness" and "driving under the influence." Federal violations are excluded.

Drunkenness.—Offenses relating to drunkenness or intoxication. Excluded is "driving under the influence."

Disorderly conduct.—Breach of the peace.

Vagrancy.—Vagabondage, begging, loitering, etc.

All other offenses.—All violations of state or local laws, except those listed above and traffic offenses.

Suspicion.—No specific offense; suspect released without formal charges being placed.

Curfew and loitering laws (persons under age 18).—Offenses relating to violations of local curfew or loitering ordinances where such laws exist.

Runaways (persons under age 18).—Limited to juveniles taken into protective custody under provisions of local statutes.

APPENDIX III

Uniform Crime Reporting Area Definitions

The presentation of statistics by reporting area facilitates analyzing local crime counts in conjunction with those for areas of similar geographical location or population size. Geographically, the United States is divisible by regions, divisions, and states. Further breakdowns rely on population figures and proximity to metropolitan areas. As a general rule, sheriffs, county police, and state police report crimes committed within the limits of counties but outside cities, while local police report crimes committed within the city limits.

Community Types

UCR data are often presented in aggregations representing three types of communities:

1. Metropolitan Statistical Areas (MSAs) - Each MSA includes a central city of at least 50,000 people or an urbanized area of at least 50,000. The county containing the central city and other contiguous counties having strong economic and social ties to the central city and county are also included. Counties in an MSA are designated "suburban" for UCR purposes. An MSA may cross state lines. The MSA concept facilitates the analysis and presentation of uniform statistical data on metropolitan areas by establishing reporting units which represent major population centers. Due to changes in the geographic composition of MSAs, no year-to-year comparisons of data for those areas should be attempted.

New England MSAs are comprised of cities and towns instead of counties. In this publication's tabular presentations, New England cities and towns are assigned to the proper MSA. Some counties, however, have both suburban and rural portions. Data for state police and sheriffs in those jurisdictions are included in statistics for the rural area.

MSAs made up approximately 79 percent of the total United States population in 1992. Some presentations in this book refer to "suburban area." A suburban area includes cities with less than 50,000 inhabitants in addition to counties (unincorporated areas) within the MSA. The central cities are, of course, excluded. The concept of suburban area is especially important because of the particular crime conditions which exist in the communities surrounding the Nation's largest cities.

2. Cities Outside MSAs - Cities outside of MSAs are mostly incorporated. They comprised 8 percent of the 1992 population of the United States.

3. Rural Counties Outside MSAs - Rural counties are comprised of mostly unincorporated areas. Law enforcement agencies in rural counties cover areas that are not under the jurisdiction of city police departments. Rural county law enforcement agencies serviced 13 percent of the national population in 1992.

The following is an illustration of the community types:

	MSA	NON-MSA
CITIES	CENTRAL CITIES 50,000 AND OVER	CITIES OUTSIDE METROPOLITAN AREAS
	SUBURBAN CITIES	
COUNTIES (including unincorporated areas)	SUBURBAN COUNTIES	RURAL COUNTIES

Population Groups

The population group classifications used by the UCR Program are:

Population Group	*Political Label*	*Population Range*
I	City	250,000 and over
II	City	100,000 to 249,999
III	City	50,000 to 99,999
IV	City	25,000 to 49,999
V	City	10,000 to 24,999
VI	City[1]	Less than 10,000
VIII (Rural County)	County[2]	N/A
IX (Suburban County)	County[2]	N/A

[1] Includes universities and colleges to which no population is attributed.

[2] Includes state police to which no population is attributed.

The major source of UCR data is the individual law enforcement agency. The number of agencies included in each population group will vary slightly from year to year due to population growth, geopolitical consolidation, municipal incorporation, etc. Population figures for individual jurisdictions are estimated by the UCR Program in noncensus years. In this edition, the population counts are based on July 1, 1992, Bureau of the Census state estimates. For all jurisdictions within each state, the populations were adjusted based on the 1992 growth rate as supplied by Census. The United States population estimate showed a 1-percent increase in 1992 over 1991. As a result of adjustments in accordance with the 1990 Census, percentages of the U.S. population in rural counties and cities outside of metropolitan areas declined for 1992, while the MSA population proportion increased.

The following table shows the number of UCR contributing agencies within each population group for 1992.

Population Group	*Number of Agencies*	*Population Covered*
I	64	46,459,923
II	134	20,014,735
III	362	24,990,803
IV	716	24,881,136
V	1,711	26,908,559
VI[1]	7,812	25,443,323
VIII (Rural County)[2]	3,608	32,116,321
IX (Suburban County)[2]	1,907	54,266,200
Total[3]	16,314	255,081,000

[1] Includes universities and colleges to which no population is attributed.

[2] Includes state police to which no population is attributed.

[3] Because of Bureau of the Census rounding, the population covered does not add to total.

Regions and Divisions

As shown in the accompanying map, the United States is comprised of four regions: the Northeastern States, the Midwestern States, the Southern States, and the Western States. These regions are further divided into nine divisions. The following table delineates the region, division, and state configuration of the country.

NORTHEASTERN STATES

- New England
  - Connecticut
  - Maine
  - Massachusetts
  - New Hampshire
  - Rhode Island
  - Vermont
- Middle Atlantic
  - New Jersey
  - New York
  - Pennsylvania

MIDWESTERN STATES

- East North Central
  - Illinois
  - Indiana
  - Michigan
  - Ohio
  - Wisconsin
- West North Central
  - Iowa
  - Kansas
  - Minnesota
  - Missouri
  - Nebraska
  - North Dakota
  - South Dakota

SOUTHERN STATES

- South Atlantic
  - Delaware
  - District of Columbia
  - Florida
  - Georgia
  - Maryland
  - North Carolina
  - South Carolina
  - Virginia
  - West Virginia
- East South Central
  - Alabama
  - Kentucky
  - Mississippi
  - Tennessee
- West South Central
  - Arkansas
  - Louisiana
  - Oklahoma
  - Texas

WESTERN STATES

- Mountain
  - Arizona
  - Colorado
  - Idaho
  - Montana
  - Nevada
  - New Mexico
  - Utah
  - Wyoming
- Pacific
  - Alaska
  - California
  - Hawaii
  - Oregon
  - Washington

APPENDIX IV

The Nation's Two Crime Measures

The U.S. Department of Justice administers two statistical programs to measure the magnitude, nature, and impact of crime in the United States: the Uniform Crime Reporting (UCR) Program and the National Crime Victimization Survey (NCVS). Because of differences in methodology and crime coverage, the results from the two programs are not strictly comparable nor consistent. By complementing each other's findings, the two programs enhance our understanding of the Nation's crime problem.

Uniform Crime Reports

The FBI's UCR Program, which began in 1929, collects information on the following crimes reported to law enforcement authorities: homicide, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson.

The UCR data are compiled from monthly law enforcement reports made directly to the FBI or to centralized state agencies that then report to the FBI. Each report submitted to the UCR Program is examined thoroughly for reasonableness, accuracy, and deviations that may indicate errors. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in a jurisdiction's boundaries. To identify any unusual fluctuations in an agency's crime counts, monthly reports are compared with previous submissions of the agency and with those for similar agencies.

Law enforcement agencies active in the UCR Program represent approximately 242 million United States inhabitants—95% of the total U. S. population.[1]

The UCR Program provides crime counts for the Nation as a whole, as well as for regions, states, counties, cities, and towns. This permits studies among neighboring jurisdictions and among those with similar populations and other common characteristics.

UCR findings for each calendar year are published initially in a preliminary release in the spring followed by a detailed annual report, *Crime in the United States,* issued in the summer following the calendar year. In addition to information on crime counts and trends, this report includes detailed data on crimes cleared, persons arrested (age, sex, race) for a wide range of crimes, law enforcement personnel (including the number of sworn officers killed or assaulted), and the characteristics of homicides (including age, sex, and race of victims and offenders, victim-offender relationships, weapons used, and circumstances surrounding the homicides). Other special reports are also available from the UCR Program.

Following a 5-year redesign effort, the UCR Program is currently converting to a more comprehensive and detailed reporting system, called the National Incident-Based Reporting System (NIBRS). NIBRS will provide detailed information about each criminal incident in 22 broad categories of offenses.

National Crime Victimization Survey

The Bureau of Justice Statistics' (BJS) NCVS, which began in 1973, collects detailed information on the frequency and nature of the crimes of rape, personal robbery, aggravated and simple assault, household burglary, personal and household theft, and motor vehicle theft. It does not measure homicide or commercial crimes (such as burglaries of stores).

Interviews are conducted by U.S. Census Bureau personnel with all household members at least 12 years old in a nationally representative sample of approximately 49,000 households (about 101,000 persons). Households stay in the sample for 3 years and are interviewed at 6-month intervals. New households rotate into the sample on an ongoing basis.

The NCVS collects information on crimes suffered by individuals and households, whether or not those crimes were reported to law enforcement. It estimates the proportion of each crime type that was reported to law enforcement, and it details the reasons given by victims for reporting or not reporting.

The survey provides information about victims (age, sex, race, ethnicity, marital status, income, and educational level), their offenders (sex, race, approximate age, and victim-offender relationship), and the crimes (time and place of occurrence, use of weapons, nature of injury, and economic consequences). Questions also cover the experiences of victims with the criminal justice system, details on self-protective measures used by victims, and possible substance abuse by offenders. Periodically, supplements are added to the survey to obtain detailed information on special topics such as school crime.

Findings from the NCVS for each calendar year are published in a press release the following April (preliminary data), in a BJS Bulletin in the fall presenting summary final data, and in a detailed report the following June covering all NCVS variables. Each year BJS staff develop Special and Technical Reports on specific crime topics.

Comparing UCR and NCVS

As the previous description illustrates, there are significant differences between the two programs. The NCVS, for example, includes crimes both reported and not reported to law enforcement, but it excludes homicide, arson, commercial crimes, and crimes against children under age

---

[1] Population coverage is according to 1992 figures.

12 (all of which are included in the UCR Program). The UCR captures crimes reported to law enforcement, but it excludes simple assaults from the Crime Index. Moreover, even when the same crimes are included in the UCR and NCVS, the definitions vary.

Another difference is the way that rate measures are presented for crimes such as burglary, household theft, and motor vehicle theft in the two programs. The UCR rates for these crimes are largely per-capita (number of crimes per 100,000 persons), whereas the NCVS rates for these crimes are per-household (number of crimes per 1,000 households). Because the number of households may not grow at the same rate each year as the total population, trend data for rates of household crimes measured by the two programs may not be comparable.

In any large-scale data collection program, there are many possible sources of error. For example, in the UCR Program, a police officer may classify a crime incorrectly, and in the NCVS a Census Bureau interviewer may incorrectly record the responses given by a crime victim. Crime data may also be affected by how the victim perceives and recalls the event. Moreover, as data are compiled and processed, clerical errors may be introduced at any stage. Both the UCR and NCVS programs employ extensive accuracy checks at various stages in the data collection process to minimize errors.

As noted above, the NCVS is based on an extensive, scientifically selected sample of American households. Thus, every crime measure presented in NCVS reports is an estimate for the Nation based on results obtained from the sample. Estimates based on a sample have sampling variation, or a margin of error (which defines a confidence interval) associated with each estimate. This means that if another sample is drawn, there is a certain probability that the resulting estimate would be somewhat different from the original one. If the survey were repeated many times with different samples, the resulting estimates would cluster around the actual measure for the entire population. Rigorous statistical methods are used for calculating the magnitude of the sampling variation associated with the NCVS estimates. Trend data in NCVS reports are described as genuine year-to-year changes only if there is at least a 90% certainty that the measured changes are not the result of sampling variation. The UCR data are based on the actual count of offenses reported by law enforcement jurisdictions. In some circumstances UCR data are estimated for nonparticipating jurisdictions or those reporting partial data.

Some differences in data from the two programs may result from the fact that NCVS estimates are subject to sampling variation. Apparent discrepancies between statistics from the two programs can usually be resolved by comparing NCVS sampling variations (confidence intervals) with UCR statistics. Year-to-year changes in individual crime categories reported by the UCR usually fall within the confidence intervals of the NCVS estimates, indicating no statistically significant differences between the output of the two programs. Even should the UCR changes fall outside the intervals, incompatibility of statistics should not be assumed. To illustrate, when differences between UCR and NCVS occur, there is a 10% chance they are due to sampling variation because of the 90% confidence level established by NCVS. It should also be noted that definitional and procedural differences between the UCR and NCVS programs can account for apparent discrepancies in data output.

As has been discussed throughout, the results of UCR and NCVS are not strictly comparable for a variety of reasons. Data users, however, possessing the basic understanding of each program's objectives, methodology, and coverage, can use the output from each in a complementary manner to better assess crime occurrence, losses, law enforcement involvement, arrestee descriptive information, and victimization data. By properly utilizing both programs in tandem, the crime issues in this country can be viewed in a much broader, more complete scope.
